IDENTITY TO IMPACT · CONCEPT PACK

Fall, don’t break

Failure and success don’t get the final word about you.

2 activities · Works without internet · Print any section with your browser’s Print option

Unlearn

Usually about 90 minutes. Adjust to your group.

Overview

LEARNING GOALS

Identity goal
Young people can say that their worth doesn’t depend on failing or winning, and plan what to do the next time they fail.

STEM goal
Young people can explain how engineers soften a hard hit, and why they test designs until they break.

Big idea (2 minutes)
“How we see ourselves shapes how we build and how we live. Two loud voices try to tell us who we are: our failures and our successes. Today, everyone will face both.”

ACTIVITY CHOICES

- **Drop protector**: best for high energy and a dramatic test.
- **Break it to learn**: best for groups who fear failure. Fully accessible to blind young people.

Identity: Scripture and reflection

Bible passage: Proverbs 24:16

What it means
Good people may fall many times, but they get up again because God holds them up. Falling isn't the end of the story.

What it doesn't mean
It doesn't say failure doesn't matter, or that faithful people never fall. Getting up comes from God, not from never failing.

Unlearn
When your design failed, or succeeded, what did you tell yourself about you? Does failing make you a failure? Does winning make you worth more?

Rediscover
The righteous rise again because God lifts them. Your worth is set by God, not by results.

Live it out
The next time you fail at something this week, what will you do differently from before?

Reflection format idea: Note to your future self. Young people write or draw a note to read the next time they fail.

Facilitator note

Ask the success question to winning teams too; accomplishments can falsely define us as much as failures. Never connect a broken design to a young person being "broken."

Activities

Drop protector

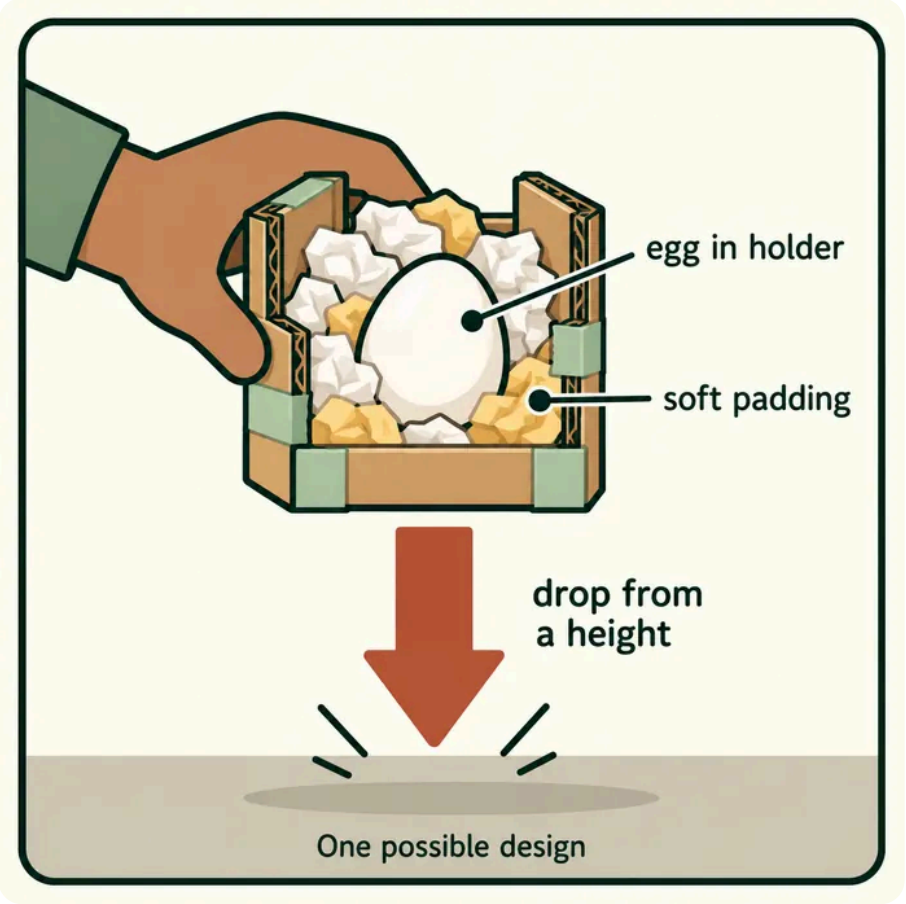

Best for: high energy and a dramatic test.

About 45 min of activity · prep about 10 min · low cost · indoor or outdoor

No reading needed | High energy | Low cost | Indoor or outdoor

Science | **Engineering**

Why this activity: Every team drops at least twice, so everyone experiences failing or succeeding, then trying again.

One possible design. Teams create their own.

STEM: Science: forces and cushioning on impact; **Engineering:** designing within limits, then redesigning.

Prep (estimate): About 10 minutes. Seal each egg in a small bag and choose a safe drop spot.

Materials per team

Two raw eggs, about 15 drinking straws, tape, and soft materials such as paper, cloth scraps, or plastic bags. Put each egg in a sealed plastic bag first to avoid mess.

Can't find it? *What matters:* a fragile object that breaks in a visible way, and padding materials that teams can shape. A small water balloon or a cracker in a bag can stand in for an egg, but each changes the challenge: a water balloon is heavier and fails by bursting; a cracker is light and fails by cracking. Decide the drop height and what counts as success before teams design. Rolled newspaper or paper strips can replace straws. These swaps are our suggestions and haven't been tested, so try one first.

Steps

1. Ask: "When aid groups drop supplies from the air, how do they keep them from breaking?"
2. Seal each egg in its plastic bag. Agree the drop height (2 m) and what counts as success before teams design.
3. Teams sketch a design using only the straws, tape, and soft materials, and predict whether it will survive, and why.
4. Build. An adult drops each design from the same height onto the same floor, letting go rather than throwing, and checks the egg.
5. Spoken failure log: What happened? Why? What will we change? Then a second drop from the same height.

Ask while they work: Where will the force hit first? What part of your design takes the impact? What did the first drop tell you?

Safety: Only adults drop from height, from a stable spot. If food is scarce where you are, think carefully about whether to use eggs.

Science, inclusion, and extensions

> **Bridge to reflection:** Every team failed or succeeded in front of everyone. Notice what you told yourself in that moment.

The science: A package that stops the object more slowly, over a longer distance, makes a gentler landing.

> **Make it harder (optional):** Work to a materials limit, such as 10 straws and 50 cm of tape. Before building, write down how your design will absorb the impact. After both drops, use evidence from what happened to explain what worked and what didn't. Or add a parachute made from a plastic bag and string to slow the fall, and compare.

Include everyone: Blind young people can listen to the landing and open the package by touch. Count down drops with fingers. Anxious young people can do a practice drop away from the group.

Source: adapted from Science Buddies, "Egg Drop Engineering Design," and TeachEngineering, "Egg Lander." Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven't been tested yet.

Have a phone? Try this: Film each drop in slow motion and watch where the impact hits hardest.

Break it to learn

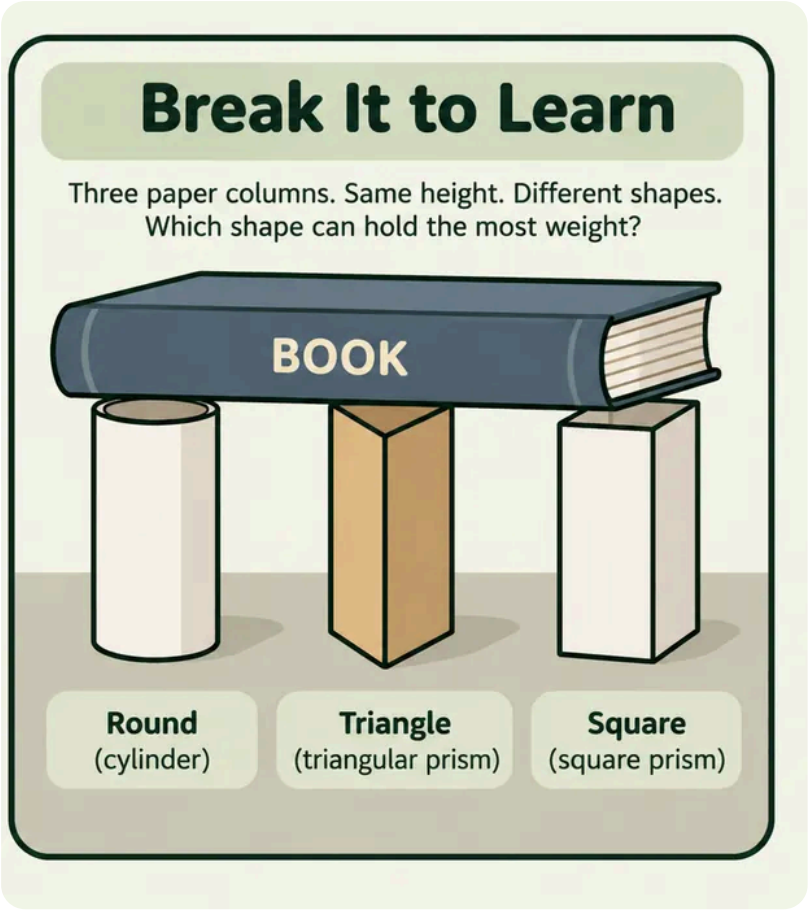

Best for: groups who fear failure. Fully accessible to blind young people.

About 35 min of activity · prep about 5 min · free · indoor

No reading needed | Medium energy | Free | Indoor

Engineering | **Math**

Why this activity: Engineers break things on purpose to learn their limits. Failure becomes information, not identity.

Three upright columns from identical sheets, ready for loading.

STEM: Engineering: how shape affects strength; **Math:** counting and comparing the load each shape holds.

Prep (estimate): About 10 minutes. Collect at least 10 books or notebooks of similar size and weight. Teams can share them.

Materials per team

8 sheets of the same plain paper (all A4, or all letter size), clear tape, a ruler, and a pencil. Shared between teams: a stack of 10 or more books or notebooks of similar size.

Can't find it? *What matters:* every column uses the same paper, and every test uses the same loads in the same order. Any plain paper works if all columns use the same kind and size. Books can be

replaced by notebooks or other flat, similar-sized items that stack steadily. We don't recommend loose bags or tins, because they don't sit flat and centred.

Steps

1. For every column, use one sheet, held the same way: short edges at the top and bottom. Each column will be as tall as the short side of the paper.
2. Square column: fold the sheet in half so the short edges meet, then fold each half in half again. Open it. You have four equal strips. Fold along the lines to make a square tube. Let the two outer edges meet, and tape the seam with one strip of tape from top to bottom.
3. Triangle column: mark the long side into three equal parts. Fold along the marks, parallel to the short edges, to make three equal strips. Fold into a triangle tube, let the edges meet, and tape the seam the same way. It is a tall column with three flat sides, not a pyramid.
4. Round column: roll the sheet into a tube, joining the long edges with the short edges at top and bottom. Let the edges overlap about 1 cm. Tape the seam the same way.
5. Stand all three columns upright on a flat table. Before loading, everyone can feel each column's shape and corners.
6. Predict which column will hold the most books.
7. Test one column at a time. Place the first book flat and centred on top. Add books one at a time, in the same order, until the column collapses. Keep hands away while it is loaded.
8. Record the number of books that the column was still holding just before the last book was added. Do not count the book that caused the collapse.
9. Test the other two columns with the same books in the same order.
10. Look at and feel each collapsed column. Did it bend, crush, or tip? To repeat a test, build a new column; a used column is weakened.
11. Redesign the weakest shape using what you learned, and test it the same way.

Ask while they work: Where did it start to fail? Was it the same for every shape? What would you change in the weakest one?

Safety: Keep hands and feet clear while a column is loaded, and test near the floor or table so books don't fall far.

Science, inclusion, and extensions

> **Bridge to reflection:** You broke columns on purpose to learn their limits. Each collapse gave you information for the next design.

The science: The books push down on the column. This push is called compression. In square and triangle columns, the load collects at the corners, where the paper buckles first. A round column spreads the load around its whole wall. Testing until collapse shows a design's limits.

> **Make it harder (optional):** Make four columns from one single sheet, each at least 6.4 cm tall, to hold the most books together. Decide the shape, size, and spacing. Keep the paper

type, books, and loading order the same as before, and explain your design choices using your earlier results.

Include everyone: Blind participants can fold and roll by feel, explore each column before loading, and feel how it bent after collapse. Hands stay clear during loading. A teammate can count books aloud. Participants with limited hand use can direct the folding, place books, or keep the record.

Source: adapted from Let's Talk Science, "Cylinders and Shapes," with the testing routine from Science Sparks, "Strong Shapes." Our changes: page orientation, fold and tape details, how we count the load, and fresh columns for repeats. Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven't been tested yet.

Session plan

A worked plan for about 90 minutes, using **Drop protector**. Times are estimates. Adapt them to your group.

Purpose

- **STEM learning:** forces, cushioning, and learning from failure.
- **Identity focus:** failure and success don't decide our worth.

Scripture: Proverbs 24:16

This proverb compares people who keep getting up with people who are brought down for good. It does not promise that faithful people never fall. It says falling is not the end.

Before the session

- Seal eggs in bags and choose a safe 2 m drop spot with a hard floor.
- Count straws and tape for each team.
- Plan where broken eggs will be cleaned up.

Time: preparation about 10 minutes (before participants arrive); session about 90 minutes.

The session

1 Connect

about 10 min

You: Welcome and play "Three-minute tower."

Participants: Take part.

Move on with: "Things fall. Today we'll design for it."

2 Introduce

about 10 min

You: Ask how aid drops keep supplies safe. Explain the materials limit, the drop height, and what counts as success.

Participants: Sketch a design and predict.

Move on with: "You have your materials. Start building."

3 Explore

about 35 min

You: Ask: "Where will the force hit first? Which part takes the impact?"

Participants: Build and do the first drop.

Move on with: "What happened? What will you change?"

4 Improve and share

about 15 min

You: Run the spoken failure log: What happened? Why? What will we change?

Participants: Rebuild and do a second drop. Share what they learned.

Move on with: "Every team learned something from falling."

5 Reflect

about 15 min

You: Read Proverbs 24:16. Use the questions below.

Participants: Talk in pairs, then share.

6 Live it out and close

about 5–10 min

You: Invite one action. Ask for feedback. Clean up eggs carefully.

Participants: Name one action.

Reflect: questions from the experience

- What did your first drop teach you?
- Unlearn: has a failure ever made you feel worthless?
- Rediscover: what does this verse say about falling?

Live it out (optional action)

This week, try again at one thing you gave up on, or encourage someone who failed.

Close, feedback, and cleanup

Ask: "What will you remember from today?" Put broken eggs in a sealed bag, wipe the floor, and wash hands.

Using the other activities in this theme

- **Break it to learn:** About 35 minutes. Indoors, very low cost, and quieter. Reflection: collapsing columns gave information for a better design.

Running the session

Before each session

- Try the activity yourself. Cut or prepare anything that slows building.
- Put materials into one set per team.
- Read the Bible passage and notes, and answer the three questions yourself first.
- Check who your safeguarding lead is.
- Make sure consent and health forms are in for every young person.

The session flow

Every session follows the same six steps. The times are estimates for a 90-minute session. Your group sets the pace, so adjust as you go.

1 Connect

about 10 min

Welcome everyone. Play a warm-up game. In the first session, agree group agreements. In later sessions, ask how last week's Live it out step went.

2 Introduce

about 10 min

Share a real-world problem and the big idea. Show the key steps and the safety rules. Teams predict what will happen.

3 Explore

25–45 min, depending on the activity

Teams build or investigate. Walk around and ask questions while they work.

4 Improve and share

10–20 min

Teams change one thing, test again, and tell the group what they found.

5 Reflect

about 15 min (at least 10)

Use the Bible passage and the three reflection questions. Talk in pairs first, then as a group. Connect reflection to what actually happened.

6 Live it out and close

5–10 min

Each person names one small action for the week. Ask for quick feedback. Clean up together and close.

How the flow supports the learning journey

I2I's learning journey is **Unlearn** → **Rediscover** → **Live it out** → **Impact**. The session flow is how you walk that journey in one meeting. Connect and Introduce raise the questions. Explore and Improve give a shared experience to think about. Reflect moves through Unlearn and Rediscover. Live it out and close turns reflection into one action, and repeated actions lead to Impact over time.

When things don't go to plan

- **People arrive late:** start Connect with whoever is there. Give late arrivals a role in an existing team rather than repeating instructions for everyone.
- **Instructions aren't clear:** stop the group, demonstrate the step again with real materials, and ask one participant to explain it back.
- **Materials are limited:** use bigger teams, give each person a clear role, or prepare some parts beforehand.
- **A build fails, or results differ from predictions:** treat it as data. Ask, "What happened? Why? What will you change?" Don't fix it for them.
- **A team finishes early:** offer the activity's "Make it harder" idea, or ask them to help test another team's design.
- **Building or discussion takes longer:** shorten Improve and share to one quick change and one retest. Keep at least 10 minutes for Reflect and 5 for closing.
- **A project needs more time:** pause at a clear point, store the work safely, and continue next session, starting with a short reminder of what each team was doing.

Always protect: safety, every participant having a real role, a short reflection, and the closing. Everything else can be shortened.

Friendly competition (optional)

Some activities, such as the catapult target round or the balloon car distance test, can include a friendly challenge. Use clear criteria, the same materials and practice time for every team, and keep everyone taking part. No one is eliminated. Recognise improvement, careful testing, and teamwork as well as results. Never score faith, personal sharing, or spiritual growth. The community showcase is never a competition.

The session steps are adapted from the UNICEF Adolescent Kit guide "Eight session steps," which recommends a routine set of steps adapted to each group. UNICEF does not endorse this toolkit.

Starting well

Young people answer honestly only when they feel safe. Build trust before asking personal questions. Start with a game that needs everyone; the Warm-ups page has ideas.

Group agreements

Agree on these in the first session, in the young person's own words if possible. Remind the group each time.

- **You can always pass.** No one has to answer.
- **What others share stays here.** Don't repeat someone's story outside the group.
- **Listen without laughing or fixing.**
- **Speak for yourself.** Share your own story, not someone else's.

Be honest about one limit. Say it at the start: "If someone tells us they are being hurt or are unsafe, we will tell someone who can help." Then no one is surprised later.

Team roles

Give each person a role, and switch roles each session so everyone gets to lead.

Role	What they do
Director	Leads the design and guides builders with words or gestures. A strong role for a young person who can't easily handle materials.
Builder	Handles materials and puts the design together (everyone helps).
Tester	Runs each test fairly and counts or measures the result.
Recorder	Remembers, draws, or writes down predictions and results.
Presenter	Shares the team's design and learning.

Talking about failure

How you respond when a design breaks teaches more than any lesson.

Instead of	Try
"That didn't work."	"What did that test teach you?"
"Here, do it like this."	"Where did it break first? Why there?"

"Good job, you won."	"What change made the biggest difference?"

Leading reflection

Every session ends with the same three questions, in this order.

> **Unlearn**
> What did you believe about yourself while you built? Where did that thought come from?

> **Rediscover**
> What does God say is true about you?

> **Live it out**
> What will you do differently this week? Name one choice, relationship, or habit.

The last answer matters most. "I am wonderfully made" is a good start. "This week I'll share my idea in class instead of staying quiet" is the goal.

Each concept suggests a different way for young people to answer, such as drawing or a pair walk, so reflection stays fresh.

Following up

- **Tell a partner.** Each young person tells a partner their Live it out plan.
- **Check in next time.** If the group meets again, start with: "How did your Live it out go?"
- **Hand it to the church.** After a single session, ask young people if the youth leader can hear their plan. The leader follows up within a week.
- **Grace, not shame.** If someone didn't do it, that's not failure. Ask what got in the way, then try again, the way a team redesigns after a test.

Include everyone in the room

Need	What helps
Limited movement or hand use	A space everyone can reach. Work at a comfortable height. Bigger materials. Offer the Director role.

Need	What helps
Low vision or blind	Let them hold materials and a finished example first. Use tests they can hear or feel. Describe results out loud.
Deaf or hard of hearing	Get their attention, then face them. Don't stand with bright light behind you. Show, then tell. Agree on hand signals. Repeat what others say. Learn a few key signs in your national sign language.
Learning differences	One step at a time. Draw the six steps and point to where you are. Short build rounds. The same routine each time.
Reading difficulties, worry, or shyness	Never make anyone read aloud. Let them draw instead of write. Offer roles that don't need presenting. Tell them before it's their turn.

If a young person tells you about abuse or harm

1. Stay calm. Listen carefully. Don't show shock or doubt.
2. Let them speak at their own pace, in their own words. Don't ask leading questions or investigate.
3. Tell them they were right to tell you, and that it is not their fault.
4. Don't promise to keep it secret. Explain kindly that you need to tell someone who can help keep them safe.
5. Write down what they said, in their words, with the date and time.
6. Tell your church's safeguarding lead the same day, and follow your church's policy. Don't confront the person they named.

Safety basics

- Adults use knives and cut bottles or thick cardboard. Young people share scissors carefully.
- Check the space for hazards before young people arrive.
- Ask young people and families privately about health needs, such as seizures, allergies, or medicine. Keep this private.
- Have clean drinking water and a basic first-aid kit nearby.

Warm-ups

Short games to build trust at the start, wake people up in the middle, or calm the group after a serious talk. Use them whenever the group needs to connect.

Human Knot

10 min, high energy, start of a session

Stand in a circle. Everyone reaches across and takes two different people's hands, then the group untangles itself without letting go.

Include everyone: If anyone can't take part physically, play Group Story instead.

Name and motion

5 min, medium energy, first session

Each person says their name with a motion. The whole group repeats both. Go around the circle.

Include everyone: A motion can be anything: a nod, a blink, a wave.

Stand up if...

5 min, low to medium energy, start of a session

Read statements such as "Stand up if you've ever fixed something that was broken" or "... if you speak more than one language." Young people discover what they share.

Include everyone: Raising a hand works as well as standing.

Human machine

5 min, medium energy, before a build

One person starts a repeating motion and sound. Others join one at a time, each connecting to someone already moving, until the group becomes one machine.

Why it helps: Every part matters to the whole machine.

Count to 20

5 min, low energy, calming

The group counts aloud, one person at a time, in no set order. If two people speak at once, start again from 1.

Include everyone: For deaf young people, play by raising fingers instead of speaking.

Back-to-back drawing

10 min, low energy, middle of a session

Pairs sit back to back. One describes a simple shape without naming it; the other draws it. Compare, then swap.

Why it helps: Clear communication is a skill engineers depend on.

Three-minute tower

5 min, high energy, before a build

Same and different

5 min, low energy, first session

Teams get 10 sheets of paper and no tape. Build the tallest standing tower in three minutes.

Why it helps: A fast first try, and a reminder that first tries are meant to be improved.

Pairs find three things they have in common and one way they're different.

Mirror

5 min, low energy, after a heavy reflection

Pairs face each other. One moves slowly; the other mirrors. Swap leaders when the facilitator says so.

Strength web

10 min, low energy, closing

Stand in a circle. Holding the end of a ball of string, name a strength you saw in someone, then pass the ball to them. Keep going until everyone is part of the web.

Why it helps: Each person is seen and connected.

Group story

5 min, low energy, any time

The group tells one story, each person adding a single sentence. Everyone can take part from where they sit.

Forms and reflection resources

Consent and health forms are required for every young person. Each form has its own Print button.

Reflection resources for your program Optional

Young people don't need a worksheet every session. Choose a rhythm that fits your group; talking or drawing is welcome too.

One-day workshop

- **Closing conversation:** Ask one or two reflection questions aloud; a written sheet is not expected.

Weekend program

- **First session:** Invite participants to notice strengths, challenges, and how they approach learning. Form: Identity Check.
- **Later session:** Choose one small way to put a lesson into practice. Form: Live It Out.
- **Final session:** Look back on learning and growth together. Form: Final Reflection.

Week-long program

- **Beginning:** Use an Identity Check as a starting point; writing is optional. Form: Identity Check.
- **Middle:** Pick a practical Live It Out action and discuss progress later. Form: Live It Out.
- **Final day:** Close with a brief written, drawn, or spoken reflection. Form: Final Reflection.

Longer series (such as six sessions)

- **Early sessions:** Invite an initial Identity Check. Form: Identity Check.
- **Midway:** Revisit learning with a Live It Out action. Form: Live It Out.
- **Last session:** Use Final Reflection to look back and choose a next step. Form: Final Reflection.

These are suggested moments, not assignments or a measure of spiritual growth. Use only the forms that help your participants.

Looking for a starting activity? Explore warm-up ideas. Need the full forms? Browse all forms.

Participation and consent template

Check your requirements

Purpose	Records agreement to take part and photo choices.
Who uses it	Families, or older participants themselves.
When	Before the first session.
Is it needed?	Follow your church's policy and local law. If your church already has a consent form, use it instead.
Who keeps it	The organiser, stored securely.
Printing	Yes, one per participant, unless you use an existing form.

Identity to Impact is a hands-on STEM programme run by _____ (church or organisation). Participants build, test, and improve designs in teams, and reflect on what the Bible says about who they are. At least two trusted adults supervise every session.

Participant's name _____ Age _____

Parent or guardian (if under 18) _____ Phone _____

☐ I agree to take part (or for the participant to take part) in Identity to Impact sessions.

☐ Photos or videos may be taken for programme use.
☐ These photos or videos may be shared publicly (for example, on church social media).
☐ No photos or videos, please.

Signature _____ Date _____

Signed by a parent or guardian for participants under 18 (or under the age your local rules set). Participants aged 18–19 can sign for themselves.

Health and emergency information

Check your requirements

Purpose	Gives adults the health and emergency details they may need.
Who uses it	Families, or older participants themselves.
When	Before the first session.
Is it needed?	Strongly recommended. Use your church's existing record if it has one.
Who keeps it	The lead facilitator, kept private and shared only with adults who need it.
Printing	Yes, unless you use an existing record.

Young person's name _____

Emergency contact _____ Phone _____

Second contact _____ Phone _____

Allergies (including latex or food) _____

Medical conditions (e.g. seizures, asthma) _____

Medication and what to do in an emergency _____

Anything that helps this young person take part fully _____

Parent or guardian signature _____ Date _____

Attendance sheet Recommended

Purpose Shows who came and who had the chance to take part.
Who uses it The facilitator.
When Every session.
Is it needed? Recommended. Your church may already keep attendance; use that if so.
Who keeps it The organiser.
Printing Optional. A notebook works.

Church or site _____ Facilitator _____

#	Name	Age	Consent	Health form	Date:	Date:	Date:	Date:	Date:

20									

Our group agreements Optional

Purpose	Reminds everyone of the agreements the group made.
Who uses it	The whole group.
When	The first session, then displayed each time.
Is it needed?	Optional.
Who keeps it	The group.
Printing	Optional; it can be written on a board.

1. You can always pass.
2. What others share stays here.
3. Listen without laughing or fixing.
4. Speak for yourself.

If someone tells us they are being hurt or are unsafe, the adults will tell someone who can help.

Session reflection Optional

Purpose	Lets participants say what they did and noticed, without scores.
Who uses it	Participants.
When	At the end of a session, if helpful.
Is it needed?	Optional. Participants can skip any question or the whole sheet.
Who keeps it	Participants keep it, or the facilitator collects it only if participants agree.
Printing	Optional.

No name needed. Skip any question. You can write, draw, or tell a facilitator privately.

Date _____ Activity _____

Today...	Yes	A bit	Not yet	No chance today
I tried an idea and tested it.	☐	☐	☐	☐
I used what happened in a test to change something.	☐	☐	☐	☐
I shared an idea or helped someone in my team.	☐	☐	☐	☐
I felt included in my team.	☐	☐	☐	☐

Asking for help or getting help is a good thing. It does not mean you did less well.

One thing I learned or noticed today (words or a drawing):

_____

_____

Anything you want the facilitator to know (optional):

_____

Identity check Optional

Purpose	Lets participants notice how their own views change across a series.
Who uses it	Participants.
When	Only at the start and end of a series, not every session.
Is it needed?	Optional, and only for a series.
Who keeps it	If collected, the organiser stores it securely. Use a participant code, not a name, and agree who can see it.
Printing	Optional.

There are no right or preferred answers. Your answers show how you see things now. They are not a score of faith and do not prove change.

Participant code (only if your organisation matches start and end answers) _____

☐ Start of series ☐ End of series

Statement	Not true	A little	Mostly	Very true	Not sure
I can name a voice that has shaped how I see myself.	☐	☐	☐	☐	☐
I can say something God says about who I am.	☐	☐	☐	☐	☐
I have done something differently because of what I believe.	☐	☐	☐	☐	☐
I believe my small actions can make a difference.	☐	☐	☐	☐	☐

Live it out follow-up notes Optional

Purpose	Helps you remember what participants chose to share, so you can ask kindly next time.
Who uses it	The facilitator.
When	At the next session.
Is it needed?	Optional.
Who keeps it	The facilitator, kept private.
Printing	Optional; a notebook works.

For the facilitator's memory only. Write an action down only if the participant agrees. Private actions do not go here. Not trying, forgetting, or finding it hard are all fine.

First name or code (with permission)	Action they chose to share	What they shared later (if anything)	Difficulties	Possible next step

Final reflection Optional

Purpose	Collects examples, questions, and feedback about the programme.
Who uses it	Participants.
When	At the end of a series.
Is it needed?	Optional.
Who keeps it	The organiser, if participants hand it in.
Printing	Optional; it can be a group discussion.

No name needed. Answer any questions you like, in writing, by drawing, in pairs, or to a facilitator.

1. Which session or activity was most useful or enjoyable, and why?

2. Was there a time something from a session came up in your life? (optional)

3. What questions do you still have?

4. Did you feel included? What would have helped?

5. What should we keep, and what should we change?

Incident or accident report

Follow your procedures

Purpose	Records an injury, accident, or near miss.
Who uses it	The facilitator.
When	The same day as any incident.
Is it needed?	Use your church's procedure; this template supports it.
Who keeps it	The programme lead or safeguarding lead.
Printing	Yes, if your church has no form of its own.

Date and time _____ Location _____

Person involved _____ Reported by _____

What happened?

_____

_____

Injuries and first aid given

_____

Parent or guardian informed? ☐ Yes ☐ No. By whom and when:

_____

What will we change to prevent this happening again?

_____

Disclosure record

Follow your procedures

Purpose Records exactly what a young person said if they share that they are being harmed.

Who uses it The adult they told.

When As soon as possible after a disclosure.

Is it needed? Always follow your church's safeguarding policy. Use this only if it has no form of its own.

Who keeps it The safeguarding lead only.

Printing Yes, if needed.

Date and time of disclosure _____ Place _____

Young person's name _____ Age _____

Adult who received the disclosure _____

What the young person said, in their own words:

_____

_____

_____

How they appeared, and anything you observed:

_____

What you said or did in response:

_____

Passed to safeguarding lead (name, date, time) _____

Signature _____
