IDENTITY TO IMPACT · CONCEPT PACK

Filter the voices

What you let through shapes what comes out.

3 activities · Works without internet · Print any section with your browser's Print option

Unlearn

Usually about 90 minutes. Adjust to your group.

Overview

LEARNING GOALS

Identity goal
Young people can name voices that shape how they see themselves, check them against what God says, and choose one to stop listening to.

STEM goal
Young people can explain how filters separate things, and why something that looks simple can hide more inside.

Big idea (2 minutes)
"How we see ourselves shapes how we build and how we live. Every day, many voices pour into us: people's opinions, culture, our past, our successes and failures, even our own thoughts. Today we'll look at what gets through."

ACTIVITY CHOICES

- **Water filter**: best for linking to a real community need.
- **Hidden colors**: best for small spaces and very low cost.
- **String telephone**: best for noisy, energetic groups.

Identity: Scripture and reflection

Bible passage: Romans 12:1–2

What it means
Paul tells believers not to copy the world's way of thinking, but to let God change them by renewing their minds. God doesn't only take things out; he puts new things in.

What it doesn't mean
It doesn't mean rejecting family, culture, or people outside church. It isn't self-improvement either: "be transformed" means God does the changing.

Unlearn
Which voices have had the loudest say about who you are? Weigh them: which agree with what God says, and which don't?

Rediscover
God doesn't only remove what's false; he renews us with what's true. What true thing does God say about you that you want to let in?

Live it out
Name one voice you won't let decide something for you this week. What will you do instead?

Reflection format idea: Pair walk. Partners walk and talk through Unlearn and Rediscover, then return for Live it out.

Facilitator note

Unlearning means weighing voices, not rejecting family, elders, or culture. Young people name kinds of voices, never specific people. Make sure Rediscover adds truth in; don't stop at filtering out.

Activities

Water filter

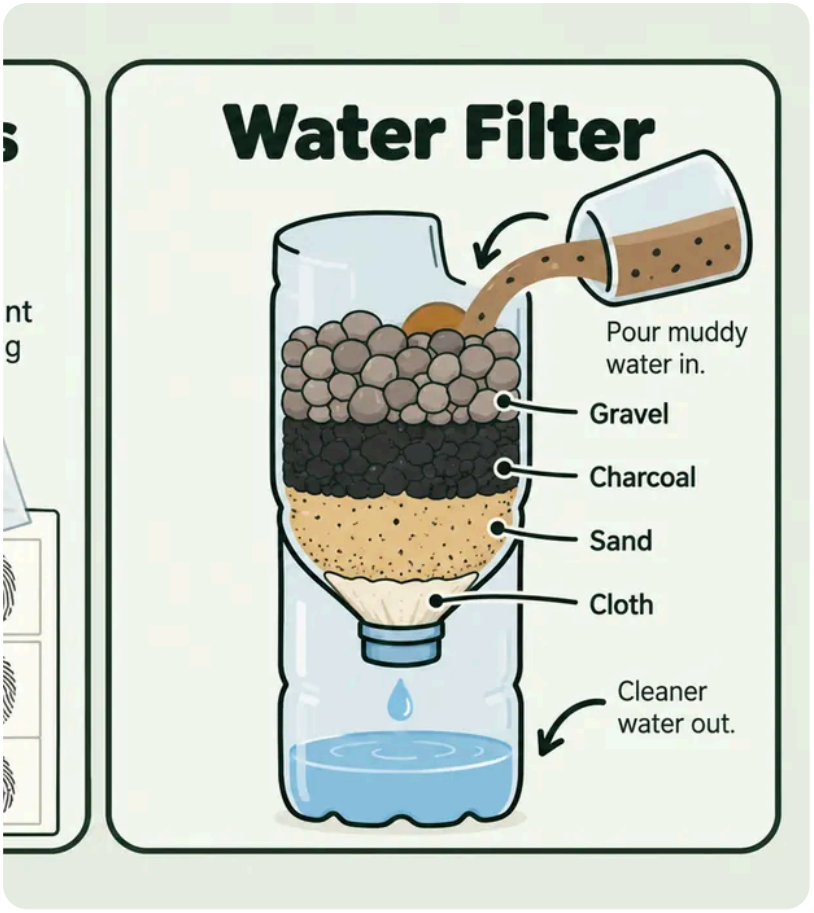

Best for: linking to a real community need.

About 40 min of activity · prep about 20 min · low cost · indoor or outdoor

No reading needed | Medium energy | Low cost | Indoor or outdoor

Science | **Technology** | **Engineering**

Why this activity: Layers decide what gets through. Young people see the dirt their filter caught and ask what they let through in their own lives.

One possible layer order. Teams choose their own.

STEM: **Science:** filtering by particle size; **Technology:** a small version of a real water-treatment system; **Engineering:** choosing and ordering layers, then improving them.

Prep (estimate): About 20 minutes. An adult cuts the bottles and mixes the muddy water beforehand.

Materials per team

The two halves of a 2-litre plastic bottle cut by an adult, about 1 cup of sand, 1 cup of small gravel, ½ cup of crushed charcoal from a cooled cooking fire, a piece of cloth or cotton, and 2 cups of muddy water (soil stirred into water).

Can't find it? *What matters:* layers with different particle sizes, and a cloth plug that holds them in. Small stones can replace gravel. Cotton wool, a coffee filter, or tissue can replace cloth. If there is no charcoal, leave it out; the filter still traps dirt, but less. A cup with small holes in the bottom can replace the top half of the bottle. These swaps are our suggestions and haven't been tested, so try one first.

Steps

1. Adult preparation: cut each bottle in half around the middle. Mix soil into water to make muddy water, and keep a cup of it unfiltered for comparison.
2. Hold up a cup of muddy water: "Would you drink this? Why not?"
3. Turn the top half of the bottle upside down and set it in the bottom half, like a funnel. Push the cloth into the neck so water must pass through it.
4. Teams decide the order of their layers (sand, gravel, charcoal) and predict which layer will clean the water most. Add the layers.
5. Stir the muddy water, then pour one cup slowly onto the top layer. Let it finish dripping before judging.
6. Compare the filtered water with the unfiltered cup. To test a change, keep the amount and the pouring the same, change only the layer order or one layer's thickness, and try it again.
7. Line up every team's water from cloudiest to clearest.

> **If it doesn't work:** If water stops dripping, the cloth or layers are packed too tightly; loosen them. If it rushes straight through, add a thicker sand layer.

Ask while they work: Which layer seems to catch the most? Is clear water always safe? What will you change, and why?

Safety: Filtered water is not safe to drink. The CDC says cloth filtering is only a first step. Water must then be boiled hard for 1 minute, or treated with a disinfectant.

Science, inclusion, and extensions

Bridge to reflection: Hold up the dirt the filters caught. Voices pour into us every day too. What gets through?

Make it harder (optional): Test one layer at a time: build a filter with only sand, then only charcoal, then only gravel. Work out what each layer removes, then use what you learn to design the best order with the fewest layers.

Include everyone: Set the filter at table height. A teammate describes each cup for young people with low vision. Draw the layer order as a picture.

Source: adapted from TeachEngineering, “Is It Safe to Drink?,” and DiscoverE, “Clean It Up.” Safety guidance from the CDC. Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven’t been tested yet.

Hidden colors

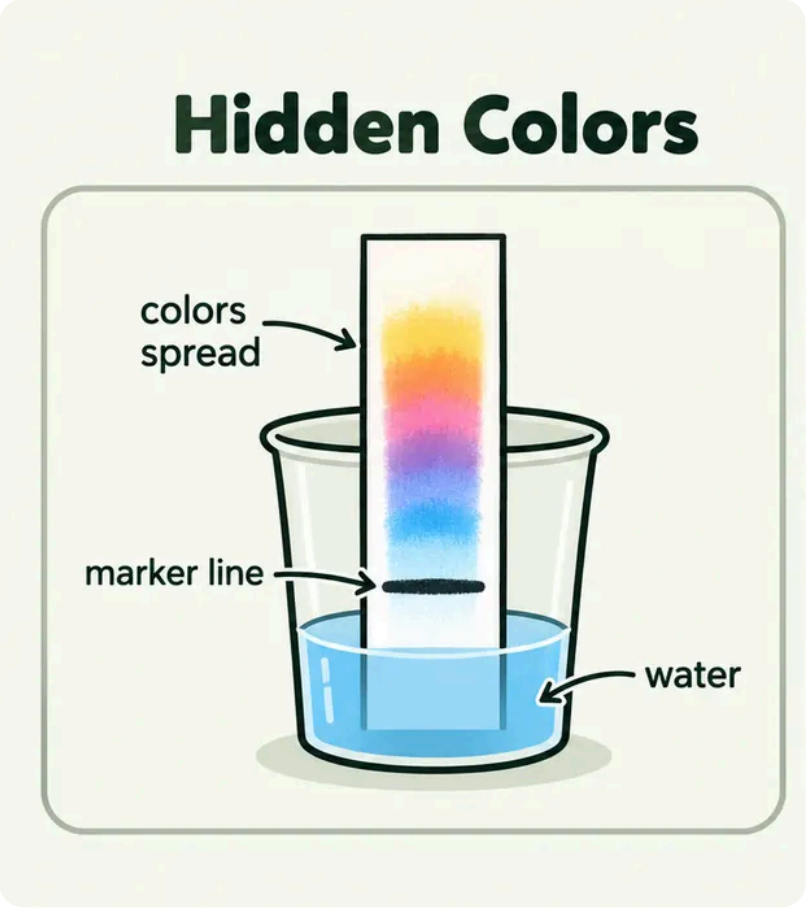

Best for: small spaces and very low cost.

About 30 min of activity · prep about 10 min · low cost · indoor

No reading needed | Low energy | Low cost | Indoor

Science

Why this activity: One black ink turns out to hold several hidden colors. Young people investigate how to separate them and compare different pens.

The strip after the water has climbed.

STEM: Science: separating a mixture by chromatography, with a fair comparison of pens.

Prep (estimate): About 10 minutes. Cut paper strips and test that your markers' ink runs in water.

Materials per team

Coffee filters or paper towel cut into strips, black washable felt-tip markers (try a few brands), a cup with 1–2 cm of water, and a pencil to hang each strip from.

Can't find it? *What matters:* paper that soaks up water evenly, and ink that dissolves in water. Paper towel or kitchen roll can replace coffee filters. Washable markers work best; permanent ink won't move in water. These swaps are our suggestions and haven't been tested, so try one first.

Steps

1. Cut the filter paper into strips about 2 cm wide and long enough to hang from the pencil into the cup.
2. Draw a thick dot of black marker about 2 cm from the bottom of a strip. Predict what colors are hiding in it.
3. Tape the top of the strip to the pencil and lay the pencil across the cup, so the bottom of the strip touches the water but the dot stays above it. The water should be about 1 cm deep.
4. Watch for 5 to 10 minutes as the water climbs the strip and separates the colors.
5. Compare markers fairly: use the same paper, dot size, dot height, water depth, and time for each, and test each marker twice.
6. Challenge: which marker hides the most colors? Can you identify a "mystery marker" by its colors?

> **If it doesn't work:** If the colors don't move, check that the marker is washable. If the dot dissolves into the water, start again with the dot higher than the water.

Ask while they work: How many colors did you predict? Why might two black markers behave differently? Is our test fair?

Science, inclusion, and extensions

> **Bridge to reflection:** One plain black dot was hiding many colors. Some voices carry more than we notice at first.

The science: Water travels up the paper and carries each pigment at a different speed, so a mixture separates.

> **Make it harder (optional):** Make a reference strip for every pen. Then use the color patterns to work out which pen wrote a "mystery note."

Include everyone: This is a visual activity; a teammate can describe colors aloud for young people with low vision.

Note: Only water-soluble ink moves with water. Test your markers before the session.

Source: adapted from Science Buddies, "Chromatography: Be a Color Detective." Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven't been tested yet.

String telephone

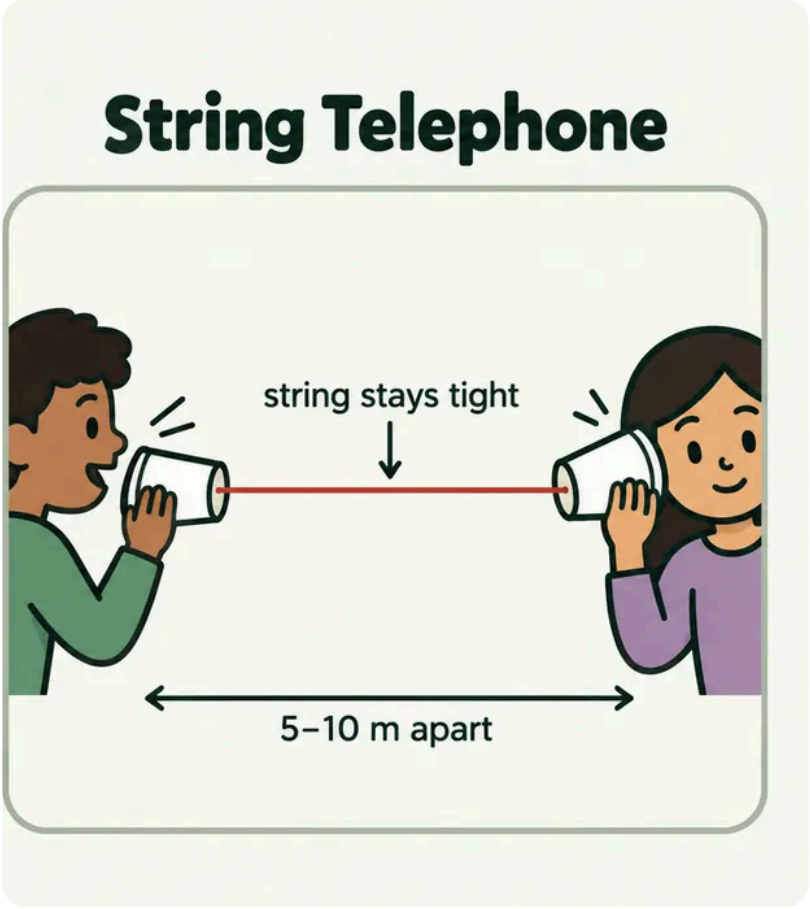

Best for: noisy, energetic groups.

About 30 min of activity · prep about 10 min · free · indoor or outdoor

No reading needed | High energy | Free | Indoor or outdoor

Science | **Technology** | **Engineering**

Why this activity: Teams work to hear one clear voice through the noise. Young people ask whose voice they are tuned to.

Keep the string tight between the cups.

STEM: Science: sound travels as vibrations; **Technology:** how a simple telephone carries sound; **Engineering:** testing strings and lengths to improve it.

Prep (estimate): About 10 minutes. An adult makes a small hole in the bottom of each cup.

Materials per team

Two paper or plastic cups (or clean tins with smooth edges), 5–10 m of string or fishing line, and a nail for an adult to make holes.

Can't find it? *What matters:* a cup base that can vibrate, and a thin string that stays tight. Clean tins work, with an adult checking the edges are smooth. Yogurt pots work too. Thread or fishing line can replace string. These swaps are our suggestions and haven't been tested, so try one first.

Steps

1. Adult preparation: make a small hole in the centre of each cup's base with the nail.
2. Push one end of the string through the hole from the outside, then tie a big knot inside the cup so it can't pull back through. Do the same with the other cup.
3. Two people walk apart until the string is straight and tight, not touching anything. One speaks into a cup while the other holds the second cup over an ear.
4. Predict what will make the voice clearer: string type, tightness, length, or cup material.
5. Test one change at a time. Keep the same speaker, the same words, and the same distance, and try each version twice before deciding.
6. Challenge: send a whispered message across the room while other teams make noise. Test what breaks the connection, such as a slack string or a finger touching it, and redesign for the clearest sound.

> **If it doesn't work:** If the knot pulls through, tie it around half a matchstick inside the cup. If you hear nothing, pull the string tighter and keep it from touching anything.

Ask while they work: What happens when the string goes slack? What if someone touches it? What will you change first?

Safety: Adults make holes. Smooth or tape tin edges. Watch for tripping over strings.

Science, inclusion, and extensions

> **Bridge to reflection:** Through all the noise, you could only hear the voice you were connected to.

The science: Sound is vibration. A tight string carries vibrations from cup to cup; slack or touching stops them.

> **Make it harder (optional):** Test different strings and lengths. Find the longest distance at which a whispered message can still be understood.

Include everyone: Deaf or hard-of-hearing young people can feel the vibrations by touching the tight string or cup. They can lead the tests of what stops the sound.

Source: adapted from TeachEngineering, "String Telephones." Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven't been tested yet.

Session plan

A worked plan for about 90 minutes, using **Water filter**. Times are estimates. Adapt them to your group.

Purpose

- **STEM learning:** filtering by particle size, and testing one change at a time.
- **Identity focus:** choosing which messages we let shape us.

Scripture: Romans 12:1–2

Paul writes to Christians in Rome, a city full of competing ideas about status and worth. He urges them not to copy the patterns around them but to be changed by God renewing their minds. It is about what shapes our thinking, not about avoiding all outside influence.

Before the session

- An adult cuts the bottles and mixes the muddy water.
- Gather sand, gravel, charcoal, and cloth. Use the calculator for amounts.
- Test one filter yourself so you know how long it takes to drip.

Time: preparation about 20 minutes (before participants arrive); session about 90 minutes.

The session

1 Connect

about 10 min

You: Welcome and play "Stand up if…".

Participants: Take part.

Move on with: "Not everything that looks clean is clean. Let's find out."

2 Introduce

about 10 min

You: Hold up muddy water: "Would you drink this? Why not?" Explain the challenge and show how the layers go in. Remind everyone not to drink any water.

Participants: Decide a layer order and predict which layer cleans most.

Move on with: "Build your filter, then pour slowly."

3 Explore

about 35 min

You: Ask: "Which layer seems to catch the most? Is clear water always safe?"

Participants: Build, pour, and compare with the unfiltered cup.

Move on with: "Change only one thing and test again."

4 Improve and share

about 15 min

You: Ask teams to change one layer and keep everything else the same.

Participants: Line up all cups from cloudiest to clearest and explain.

Move on with: "A filter decides what gets through. So do we."

5 Reflect

about 15 min

You: Read Romans 12:1–2. Use the questions below.

Participants: Talk in pairs, then share.

6 Live it out and close

about 5–10 min

You: Invite one action. Ask for quick feedback. Clean up spills.

Participants: Name one action.

Reflect: questions from the experience

- What did the filter catch, and what still got through?
- Unlearn: what messages about yourself have you let through without checking them?
- Rediscover: what does this passage say should shape your thinking?

Live it out (optional action)

This week, notice one message (from social media, a friend, or your own thoughts) and check it against what God says about you.

Close, feedback, and cleanup

Ask what helped them learn today. Pour muddy water away outside, rinse bottles, and wipe tables.

Using the other activities in this theme

- **String telephone:** About 30 minutes. Needs space to spread out. Reflection: which voice is clearest when there is noise around?
- **Hidden colors:** About 30 minutes. Quiet and low cost. Reflection: one black dot held hidden colors; first impressions don't show everything.

Running the session

Before each session

- Try the activity yourself. Cut or prepare anything that slows building.
- Put materials into one set per team.
- Read the Bible passage and notes, and answer the three questions yourself first.
- Check who your safeguarding lead is.
- Make sure consent and health forms are in for every young person.

The session flow

Every session follows the same six steps. The times are estimates for a 90-minute session. Your group sets the pace, so adjust as you go.

1 Connect — about 10 min

Welcome everyone. Play a warm-up game. In the first session, agree group agreements. In later sessions, ask how last week's Live it out step went.

2 Introduce — about 10 min

Share a real-world problem and the big idea. Show the key steps and the safety rules. Teams predict what will happen.

3 Explore — 25–45 min, depending on the activity

Teams build or investigate. Walk around and ask questions while they work.

4 Improve and share — 10–20 min

Teams change one thing, test again, and tell the group what they found.

5 Reflect — about 15 min (at least 10)

Use the Bible passage and the three reflection questions. Talk in pairs first, then as a group. Connect reflection to what actually happened.

6 Live it out and close — 5–10 min

Each person names one small action for the week. Ask for quick feedback. Clean up together and close.

How the flow supports the learning journey

I2I's learning journey is **Unlearn** → **Rediscover** → **Live it out** → **Impact**. The session flow is how you walk that journey in one meeting. Connect and Introduce raise the questions. Explore and Improve give a shared experience to think about. Reflect moves through Unlearn and Rediscover. Live it out and close turns reflection into one action, and repeated actions lead to Impact over time.

When things don't go to plan

- **People arrive late:** start Connect with whoever is there. Give late arrivals a role in an existing team rather than repeating instructions for everyone.
- **Instructions aren't clear:** stop the group, demonstrate the step again with real materials, and ask one participant to explain it back.
- **Materials are limited:** use bigger teams, give each person a clear role, or prepare some parts beforehand.
- **A build fails, or results differ from predictions:** treat it as data. Ask, "What happened? Why? What will you change?" Don't fix it for them.
- **A team finishes early:** offer the activity's "Make it harder" idea, or ask them to help test another team's design.
- **Building or discussion takes longer:** shorten Improve and share to one quick change and one retest. Keep at least 10 minutes for Reflect and 5 for closing.
- **A project needs more time:** pause at a clear point, store the work safely, and continue next session, starting with a short reminder of what each team was doing.

Always protect: safety, every participant having a real role, a short reflection, and the closing. Everything else can be shortened.

Friendly competition (optional)

Some activities, such as the catapult target round or the balloon car distance test, can include a friendly challenge. Use clear criteria, the same materials and practice time for every team, and keep everyone taking part. No one is eliminated. Recognise improvement, careful testing, and teamwork as well as results. Never score faith, personal sharing, or spiritual growth. The community showcase is never a competition.

The session steps are adapted from the UNICEF Adolescent Kit guide "Eight session steps," which recommends a routine set of steps adapted to each group. UNICEF does not endorse this toolkit.

Starting well

Young people answer honestly only when they feel safe. Build trust before asking personal questions. Start with a game that needs everyone; the Warm-ups page has ideas.

Group agreements

Agree on these in the first session, in the young person's own words if possible. Remind the group each time.

- **You can always pass.** No one has to answer.
- **What others share stays here.** Don't repeat someone's story outside the group.
- **Listen without laughing or fixing.**
- **Speak for yourself.** Share your own story, not someone else's.

Be honest about one limit. Say it at the start: "If someone tells us they are being hurt or are unsafe, we will tell someone who can help." Then no one is surprised later.

Team roles

Give each person a role, and switch roles each session so everyone gets to lead.

Role	What they do
Director	Leads the design and guides builders with words or gestures. A strong role for a young person who can't easily handle materials.
Builder	Handles materials and puts the design together (everyone helps).
Tester	Runs each test fairly and counts or measures the result.
Recorder	Remembers, draws, or writes down predictions and results.
Presenter	Shares the team's design and learning.

Talking about failure

How you respond when a design breaks teaches more than any lesson.

Instead of	Try
"That didn't work."	"What did that test teach you?"
"Here, do it like this."	"Where did it break first? Why there?"

"Good job, you won."	"What change made the biggest difference?"

Leading reflection

Every session ends with the same three questions, in this order.

> **Unlearn**
> What did you believe about yourself while you built? Where did that thought come from?

> **Rediscover**
> What does God say is true about you?

> **Live it out**
> What will you do differently this week? Name one choice, relationship, or habit.

The last answer matters most. "I am wonderfully made" is a good start. "This week I'll share my idea in class instead of staying quiet" is the goal.

Each concept suggests a different way for young people to answer, such as drawing or a pair walk, so reflection stays fresh.

Following up

- **Tell a partner.** Each young person tells a partner their Live it out plan.
- **Check in next time.** If the group meets again, start with: "How did your Live it out go?"
- **Hand it to the church.** After a single session, ask young people if the youth leader can hear their plan. The leader follows up within a week.
- **Grace, not shame.** If someone didn't do it, that's not failure. Ask what got in the way, then try again, the way a team redesigns after a test.

Include everyone in the room

Need	What helps
Limited movement or hand use	A space everyone can reach. Work at a comfortable height. Bigger materials. Offer the Director role.

Need	What helps
Low vision or blind	Let them hold materials and a finished example first. Use tests they can hear or feel. Describe results out loud.
Deaf or hard of hearing	Get their attention, then face them. Don't stand with bright light behind you. Show, then tell. Agree on hand signals. Repeat what others say. Learn a few key signs in your national sign language.
Learning differences	One step at a time. Draw the six steps and point to where you are. Short build rounds. The same routine each time.
Reading difficulties, worry, or shyness	Never make anyone read aloud. Let them draw instead of write. Offer roles that don't need presenting. Tell them before it's their turn.

If a young person tells you about abuse or harm

1. Stay calm. Listen carefully. Don't show shock or doubt.
2. Let them speak at their own pace, in their own words. Don't ask leading questions or investigate.
3. Tell them they were right to tell you, and that it is not their fault.
4. Don't promise to keep it secret. Explain kindly that you need to tell someone who can help keep them safe.
5. Write down what they said, in their words, with the date and time.
6. Tell your church's safeguarding lead the same day, and follow your church's policy. Don't confront the person they named.

Safety basics

- Adults use knives and cut bottles or thick cardboard. Young people share scissors carefully.
- Check the space for hazards before young people arrive.
- Ask young people and families privately about health needs, such as seizures, allergies, or medicine. Keep this private.
- Have clean drinking water and a basic first-aid kit nearby.

Warm-ups

Short games to build trust at the start, wake people up in the middle, or calm the group after a serious talk. Use them whenever the group needs to connect.

Human Knot

10 min, high energy, start of a session

Stand in a circle. Everyone reaches across and takes two different people's hands, then the group untangles itself without letting go.

Include everyone: If anyone can't take part physically, play Group Story instead.

Name and motion

5 min, medium energy, first session

Each person says their name with a motion. The whole group repeats both. Go around the circle.

Include everyone: A motion can be anything: a nod, a blink, a wave.

Stand up if...

5 min, low to medium energy, start of a session

Read statements such as "Stand up if you've ever fixed something that was broken" or "... if you speak more than one language." Young people discover what they share.

Include everyone: Raising a hand works as well as standing.

Human machine

5 min, medium energy, before a build

One person starts a repeating motion and sound. Others join one at a time, each connecting to someone already moving, until the group becomes one machine.

Why it helps: Every part matters to the whole machine.

Count to 20

5 min, low energy, calming

The group counts aloud, one person at a time, in no set order. If two people speak at once, start again from 1.

Include everyone: For deaf young people, play by raising fingers instead of speaking.

Back-to-back drawing

10 min, low energy, middle of a session

Pairs sit back to back. One describes a simple shape without naming it; the other draws it. Compare, then swap.

Why it helps: Clear communication is a skill engineers depend on.

Three-minute tower

5 min, high energy, before a build

Same and different

5 min, low energy, first session

Teams get 10 sheets of paper and no tape. Build the tallest standing tower in three minutes.

Why it helps: A fast first try, and a reminder that first tries are meant to be improved.

Pairs find three things they have in common and one way they're different.

Mirror

5 min, low energy, after a heavy reflection

Pairs face each other. One moves slowly; the other mirrors. Swap leaders when the facilitator says so.

Strength web

10 min, low energy, closing

Stand in a circle. Holding the end of a ball of string, name a strength you saw in someone, then pass the ball to them. Keep going until everyone is part of the web.

Why it helps: Each person is seen and connected.

Group story

5 min, low energy, any time

The group tells one story, each person adding a single sentence. Everyone can take part from where they sit.

Forms and reflection resources

Consent and health forms are required for every young person. Each form has its own Print button.

Reflection resources for your program Optional

Young people don't need a worksheet every session. Choose a rhythm that fits your group; talking or drawing is welcome too.

One-day workshop

- **Closing conversation:** Ask one or two reflection questions aloud; a written sheet is not expected.

Weekend program

- **First session:** Invite participants to notice strengths, challenges, and how they approach learning. Form: Identity Check.
- **Later session:** Choose one small way to put a lesson into practice. Form: Live It Out.
- **Final session:** Look back on learning and growth together. Form: Final Reflection.

Week-long program

- **Beginning:** Use an Identity Check as a starting point; writing is optional. Form: Identity Check.
- **Middle:** Pick a practical Live It Out action and discuss progress later. Form: Live It Out.
- **Final day:** Close with a brief written, drawn, or spoken reflection. Form: Final Reflection.

Longer series (such as six sessions)

- **Early sessions:** Invite an initial Identity Check. Form: Identity Check.
- **Midway:** Revisit learning with a Live It Out action. Form: Live It Out.
- **Last session:** Use Final Reflection to look back and choose a next step. Form: Final Reflection.

These are suggested moments, not assignments or a measure of spiritual growth. Use only the forms that help your participants.

Looking for a starting activity? Explore warm-up ideas. Need the full forms? Browse all forms.

Participation and consent template

Check your requirements

Purpose	Records agreement to take part and photo choices.
Who uses it	Families, or older participants themselves.
When	Before the first session.
Is it needed?	Follow your church's policy and local law. If your church already has a consent form, use it instead.
Who keeps it	The organiser, stored securely.
Printing	Yes, one per participant, unless you use an existing form.

Identity to Impact is a hands-on STEM programme run by _____ (church or organisation). Participants build, test, and improve designs in teams, and reflect on what the Bible says about who they are. At least two trusted adults supervise every session.

Participant's name _____ Age _____

Parent or guardian (if under 18) _____ Phone _____

☐ I agree to take part (or for the participant to take part) in Identity to Impact sessions.

☐ Photos or videos may be taken for programme use.
☐ These photos or videos may be shared publicly (for example, on church social media).
☐ No photos or videos, please.

Signature _____ Date _____

Signed by a parent or guardian for participants under 18 (or under the age your local rules set). Participants aged 18–19 can sign for themselves.

Health and emergency information

Check your requirements

Purpose	Gives adults the health and emergency details they may need.
Who uses it	Families, or older participants themselves.
When	Before the first session.
Is it needed?	Strongly recommended. Use your church's existing record if it has one.
Who keeps it	The lead facilitator, kept private and shared only with adults who need it.
Printing	Yes, unless you use an existing record.

Young person's name _____

Emergency contact _____ Phone _____

Second contact _____ Phone _____

Allergies (including latex or food) _____

Medical conditions (e.g. seizures, asthma) _____

Medication and what to do in an emergency _____

Anything that helps this young person take part fully _____

Parent or guardian signature _____ Date _____

Attendance sheet Recommended

Purpose Shows who came and who had the chance to take part.
Who uses it The facilitator.
When Every session.
Is it needed? Recommended. Your church may already keep attendance; use that if so.
Who keeps it The organiser.
Printing Optional. A notebook works.

Church or site _____ Facilitator _____

Our group agreements Optional

Purpose	Reminds everyone of the agreements the group made.
Who uses it	The whole group.
When	The first session, then displayed each time.
Is it needed?	Optional.
Who keeps it	The group.
Printing	Optional; it can be written on a board.

1. You can always pass.
2. What others share stays here.
3. Listen without laughing or fixing.
4. Speak for yourself.

If someone tells us they are being hurt or are unsafe, the adults will tell someone who can help.

Session reflection Optional

Purpose	Lets participants say what they did and noticed, without scores.
Who uses it	Participants.
When	At the end of a session, if helpful.
Is it needed?	Optional. Participants can skip any question or the whole sheet.
Who keeps it	Participants keep it, or the facilitator collects it only if participants agree.
Printing	Optional.

No name needed. Skip any question. You can write, draw, or tell a facilitator privately.

Date _____ Activity _____

Today...	Yes	A bit	Not yet	No chance today
I tried an idea and tested it.	☐	☐	☐	☐
I used what happened in a test to change something.	☐	☐	☐	☐
I shared an idea or helped someone in my team.	☐	☐	☐	☐
I felt included in my team.	☐	☐	☐	☐

Asking for help or getting help is a good thing. It does not mean you did less well.

One thing I learned or noticed today (words or a drawing):

_____

_____

Anything you want the facilitator to know (optional):

_____

Identity check Optional

Purpose	Lets participants notice how their own views change across a series.
Who uses it	Participants.
When	Only at the start and end of a series, not every session.
Is it needed?	Optional, and only for a series.
Who keeps it	If collected, the organiser stores it securely. Use a participant code, not a name, and agree who can see it.
Printing	Optional.

There are no right or preferred answers. Your answers show how you see things now. They are not a score of faith and do not prove change.

Participant code (only if your organisation matches start and end answers) _____

☐ Start of series ☐ End of series

Statement	Not true	A little	Mostly	Very true	Not sure
I can name a voice that has shaped how I see myself.	☐	☐	☐	☐	☐
I can say something God says about who I am.	☐	☐	☐	☐	☐
I have done something differently because of what I believe.	☐	☐	☐	☐	☐
I believe my small actions can make a difference.	☐	☐	☐	☐	☐

Live it out follow-up notes Optional

Purpose	Helps you remember what participants chose to share, so you can ask kindly next time.
Who uses it	The facilitator.
When	At the next session.
Is it needed?	Optional.
Who keeps it	The facilitator, kept private.
Printing	Optional; a notebook works.

For the facilitator's memory only. Write an action down only if the participant agrees. Private actions do not go here. Not trying, forgetting, or finding it hard are all fine.

First name or code (with permission)	Action they chose to share	What they shared later (if anything)	Difficulties	Possible next step

Final reflection Optional

Purpose	Collects examples, questions, and feedback about the programme.
Who uses it	Participants.
When	At the end of a series.
Is it needed?	Optional.
Who keeps it	The organiser, if participants hand it in.
Printing	Optional; it can be a group discussion.

No name needed. Answer any questions you like, in writing, by drawing, in pairs, or to a facilitator.

1. Which session or activity was most useful or enjoyable, and why?

2. Was there a time something from a session came up in your life? (optional)

3. What questions do you still have?

4. Did you feel included? What would have helped?

5. What should we keep, and what should we change?

Incident or accident report

Follow your procedures

Purpose	Records an injury, accident, or near miss.
Who uses it	The facilitator.
When	The same day as any incident.
Is it needed?	Use your church's procedure; this template supports it.
Who keeps it	The programme lead or safeguarding lead.
Printing	Yes, if your church has no form of its own.
