IDENTITY TO IMPACT · CONCEPT PACK

Light for the community

Your light is for others to see God's goodness.

2 activities · Works without internet · Print any section with your browser's Print option

Impact

Usually about 90 minutes. Adjust to your group.

Overview

LEARNING GOALS

Identity goal
Young people can see themselves as people God sends to serve others, and name a first step toward a real need.

STEM goal
Young people can describe a real problem, design an idea, improve it with feedback, and present it clearly.

Big idea (2 minutes)
"How we see ourselves shapes how we live, and what we give. Today you'll design your first domino for a real need here."

ACTIVITY CHOICES

- **Community design project**: best for the final session of a series.
- **Bottle light**: best for sunny days or a strong torch, and a real-world invention.

Identity: Scripture and reflection

Bible passage: Matthew 5:14–16

What it means
Jesus calls his followers the light of the world. People see their good actions and praise God.

What it doesn't mean
It isn't about showing off. Jesus warns against doing good just to be seen (Matthew 6:1). The light points to God.

Unlearn
Who says young people can't solve real problems? Have you believed it?

Rediscover
You are light, and the goal is that people see God's goodness, not only us.

Live it out
What's your first small step this month, and who will you ask to help?

Reflection format idea: Commitment cards. Young people write or draw their first step and pin it beside their project in the gallery.

Activities

Community design project

Best for: the end of a series. Option: split into two sessions—design and test first, improve and share next time.

About 40 min of activity · prep about 5 min · low cost · indoor or outdoor

Some reading | Medium energy | Low cost | Indoor or outdoor

Engineering

Why this activity: Choose a community challenge, design and test an idea, then share what you learned.

A community map and a simple model.

STEM: Engineering: the design process: understand a need, sketch or model an idea, get feedback, and improve it. Drawing and presenting help teams share their ideas clearly.

Prep (estimate): About 10 minutes. Gather large paper or flattened cardboard, drawing materials, and a box of clean scrap materials. Decide who will follow up with teams after the session.

Materials per team

Large paper or flattened cardboard (one per team), markers, pencils, or charcoal, tape, scissors, and clean scrap materials for models, such as small boxes, bottle caps, paper cups, card, string, and straws. Collect a mixed box for the whole group; teams take what their design needs.

Can't find it? If paper is short, draw the community map with chalk on the ground or with a stick in sand outside, and photograph or copy it afterwards. Models can be made from whatever clean scrap is available.

Steps

1. Draw a simple map of your community together on large paper, cardboard, or the ground. Mark homes, roads, the church, schools, water points, and places people gather.
2. Participants mark places where people face problems, such as unsafe crossings, rubbish, a lack of light, or loneliness.
3. Each team picks one problem and answers: Who is affected? What might cause it? What do we not yet know?
4. Check understanding: where practical, teams ask someone affected, a family member, or a leader whether they have understood the problem and whether their idea would help. Teams don't assume they already know what others need.
5. Teams make a poster or a prototype. A prototype is a simple first model, made quickly to test an idea. Show the problem, who it affects, the idea, and one first small step.
6. Pitch: each team explains its idea to another team in about two minutes. The listening team asks, "What would make this work better?" Teams improve their design.
7. Display: teams set out their posters or models. Half of each team stays to explain while the other half visits other teams; then they swap.
8. Take it further: each team names one person who could help, such as a pastor, school leader, or local official, and plans how to share the idea.

> **If it doesn't work:** If a team can't choose a problem, ask them to choose the one they talked about most. If an idea is too big, ask: "What is one small first step you could take this month?"

Ask while they work: Who did you ask about this problem? What don't we know yet? What is one small first step?

Optional showcase: Invite families and church members to a gallery walk where teams share their ideas. Celebrate every team. This isn't a contest, so there are no prizes or rankings. Keep costs low, for example with a shared meal. Certificates of recognition are in the Forms section.

Follow-up: Before the session, agree who will contact each team afterwards and when, such as a local youth leader two weeks later. If you are a visiting facilitator, hand this to a local leader before you leave.

Science, inclusion, and extensions

Bridge to reflection: You started with a real need and a first small step. That's how impact begins.

Make it harder (optional): Build a simple working prototype. Show it to at least two people affected by the problem, record their feedback, and improve the prototype using what they said.

Include everyone: Young people can present by speaking, through a teammate, with a model, or with drawings.

Source: adapted from the UNICEF Adolescent Kit activity guides "Forming problem and opportunity statements," "Prototyping," and "Organizing an exhibition." Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven't been tested yet.

Bottle light

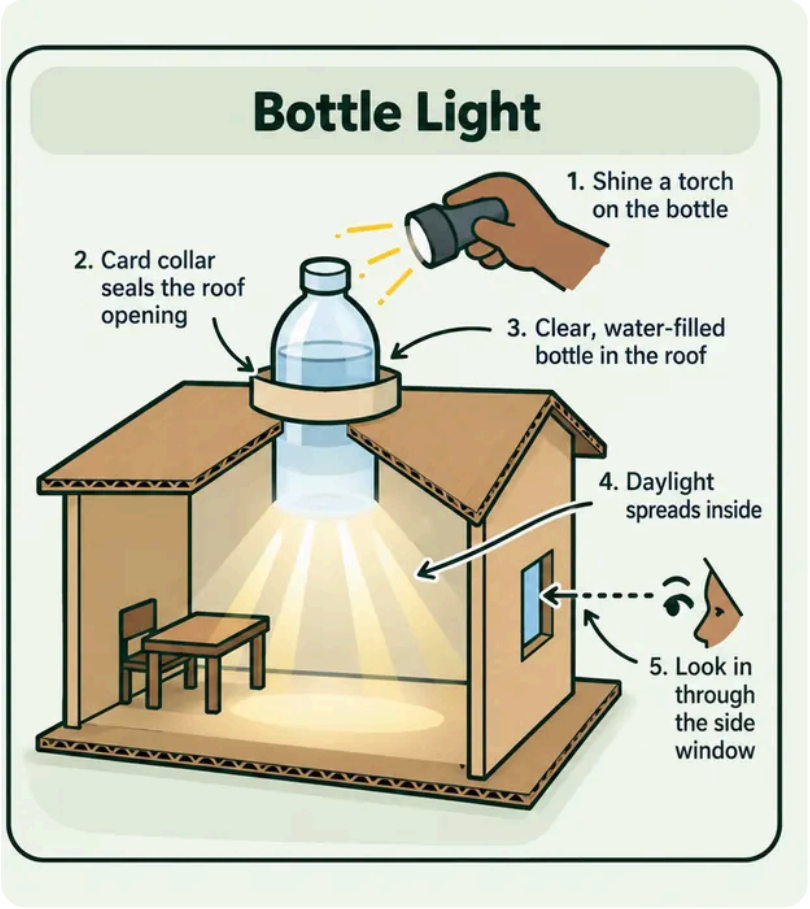

Best for: sunny days or a strong torch, and a real-world invention.

About 30 min of activity · prep about 15 min · free · outdoor

No reading needed | Low energy | Free | Outdoor

Science | **Technology** | **Engineering**

Why this activity: A water-filled bottle in a roof can bring daylight into a dark room without electricity. Teams test how it changes the light inside a model house.

Comparison 3: the water-filled bottle. Comparisons 1 and 2 use an open hole and an empty bottle.

STEM: Science: water bends and spreads light; **Technology:** a real low-cost lighting technology used in homes; **Engineering:** fitting and sealing the bottle.

Prep (estimate): About 20 minutes. Cut the box openings and test the setup once with your torch.

Materials per team

A large cardboard box for the model house, a clear 1–2 litre plastic bottle with its cap, plain water, a 15 cm square of card for the collar, scissors (adult), tape, and a torch. Optional: a dark cloth.

Can't find it? *What matters:* the bottle must be clear and smooth, the room must be dark inside, and the light source must stay in the same place for each comparison. Any clear plastic bottle can

work. A crate covered with a dark cloth can replace a box. Bright sunlight from a window can replace the torch if it stays steady. These swaps are our suggestions and haven't been tested.

Steps

1. Adult preparation: cut a hole in the roof (top) of the box, just big enough for the bottle to pass through. Cut a small window in one side so you can look in.
2. Make the collar: draw a circle in the centre of the card square, the same size as the bottle. Cut it out. Make short cuts outward from the hole all around, and bend the small flaps up.
3. Slide the collar over the bottle so it rests about one third of the way down from the cap. The collar will hold the bottle in the roof hole.
4. Comparison 1, open hole: with no bottle in the roof, shine the torch straight down at the roof hole from the same height each time. Look through the side window and describe the light.
5. Comparison 2, empty bottle: put the empty bottle (with its cap on) into the roof hole so the collar rests on the roof. The top part sticks out above the roof, and most of the bottle hangs inside. Tape or cover any gaps around the collar. Shine the torch the same way and look again.
6. Comparison 3, water bottle: remove the bottle, fill it with water, put the cap back on, and put it back the same way. Shine the torch the same way and look again.
7. Repeat each comparison once more in the same order. Record what you see each time: where the light falls, and how far it spreads.
8. Discuss: what did the water change?

> **If it doesn't work:** If it's hard to see any difference, darken the room or cover the box with a cloth, and keep the torch at exactly the same position and angle.

Ask while they work: Where does the light fall with the open hole? What changed with water? Where does the light come from?

Safety: Use plain water only. An adult does the cutting. A real roof installation needs the owner's permission and a skilled installer.

Science, inclusion, and extensions

> **Bridge to reflection:** The bottle didn't make any light. It took light that was already shining and spread it into a dark space where people could use it.

The science: Light changes direction when it passes from air into water and back out. This is called refraction. The water-filled bottle redirects incoming light and spreads it inside the room. It does not create or store light, so a real bottle roof light works only in daylight. Real installations seal the bottle into a roof.

> **Make it harder (optional):** Choose one feature to change, such as how far the bottle hangs into the room or the bottle's size, and keep everything else the same. Predict, then compare the light pattern twice for each version. Explain your results using refraction.

Include everyone: Participants who are blind or have low vision can measure and cut the collar with support, place the bottle, hold the torch in position, and keep the record. Teammates describe exactly where the light falls each time, using agreed words such as “only under the bottle” or “across the floor.”

Source: adapted from Science in School, “Light refraction in primary education: the solar bottle bulb” (Wegner and Ohlberger), based on Alfredo Moser’s design. Our changes: the three-way comparison order. Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven’t been tested yet.

Session plan

A worked plan for about 90 minutes, using **Community design project**. Times are estimates. Adapt them to your group.

Purpose

- **STEM learning:** the design process: understand a problem, make a prototype, get feedback, and improve.
- **Identity focus:** being light by serving the community.

Scripture: Matthew 5:14–16

Jesus tells ordinary listeners that they are the light of the world. Light is meant to be seen and used. The goal is that people see good works and praise God, not the person.

Before the session

- Gather large paper, drawing materials, and a mixed box of scrap.
- Agree who will follow up with teams afterwards, and when.
- Think of one or two local people teams could ask about a problem.

Time: preparation about 10 minutes (before participants arrive); session about 90 minutes.

The session

1 Connect

about 10 min

You: Welcome and play "Same and different."

Participants: Take part.

Move on with: "We all live in this community. What do we notice?"

2 Introduce

about 10 min

You: Explain the map and the goal: one problem, one small first step. Explain the word "prototype."

Participants: Draw the community map together.

Move on with: "Mark places where people face problems."

3 Explore

about 40 min

You: Ask: "Who is affected? What don't we know yet?" Encourage teams to check their understanding with someone affected, where practical.

Participants: Choose a problem and make a poster or prototype.

Move on with: "Show your idea to another team."

4 Improve and share

about 15 min

You: Run the pitch and the display swap.

Participants: Pitch, listen to feedback, and improve.

Move on with: "Light is meant to be seen and used."

5 Reflect

about 15 min

You: Read Matthew 5:14–16. Use the questions below.

Participants: Talk in pairs, then share.

6 Live it out and close

about 5 min

You: Agree each team's first step and who will follow up. Ask for feedback.

Participants: Name the first step.

Reflect: questions from the experience

- What did you learn about the problem that surprised you?
- Unlearn: have you thought you were too young to make a difference?
- Rediscover: what does Jesus call his followers?

Live it out (optional action)

Each team takes its first small step, such as sharing its idea with the person it named.

Close, feedback, and cleanup

Display or store the posters safely. Confirm the follow-up plan. Clean up scraps.

Using the other activities in this theme

- **Bottle light:** About 30 minutes. Needs a dark corner and an adult to cut boxes beforehand. Reflection: the bottle redirected light that was already there; it didn't create it.

Running the session

Before each session

- Try the activity yourself. Cut or prepare anything that slows building.
- Put materials into one set per team.
- Read the Bible passage and notes, and answer the three questions yourself first.
- Check who your safeguarding lead is.
- Make sure consent and health forms are in for every young person.

The session flow

Every session follows the same six steps. The times are estimates for a 90-minute session. Your group sets the pace, so adjust as you go.

1 **Connect** — about 10 min

Welcome everyone. Play a warm-up game. In the first session, agree group agreements. In later sessions, ask how last week's Live it out step went.

2 **Introduce** — about 10 min

Share a real-world problem and the big idea. Show the key steps and the safety rules. Teams predict what will happen.

3 **Explore** — 25–45 min, depending on the activity

Teams build or investigate. Walk around and ask questions while they work.

4 **Improve and share** — 10–20 min

Teams change one thing, test again, and tell the group what they found.

5 **Reflect** — about 15 min (at least 10)

Use the Bible passage and the three reflection questions. Talk in pairs first, then as a group. Connect reflection to what actually happened.

6 **Live it out and close** — 5–10 min

Each person names one small action for the week. Ask for quick feedback. Clean up together and close.

How the flow supports the learning journey

I2I's learning journey is **Unlearn** → **Rediscover** → **Live it out** → **Impact**. The session flow is how you walk that journey in one meeting. Connect and Introduce raise the questions. Explore and Improve give a shared experience to think about. Reflect moves through Unlearn and Rediscover. Live it out and close turns reflection into one action, and repeated actions lead to Impact over time.

When things don't go to plan

- **People arrive late:** start Connect with whoever is there. Give late arrivals a role in an existing team rather than repeating instructions for everyone.
- **Instructions aren't clear:** stop the group, demonstrate the step again with real materials, and ask one participant to explain it back.
- **Materials are limited:** use bigger teams, give each person a clear role, or prepare some parts beforehand.
- **A build fails, or results differ from predictions:** treat it as data. Ask, "What happened? Why? What will you change?" Don't fix it for them.
- **A team finishes early:** offer the activity's "Make it harder" idea, or ask them to help test another team's design.
- **Building or discussion takes longer:** shorten Improve and share to one quick change and one retest. Keep at least 10 minutes for Reflect and 5 for closing.
- **A project needs more time:** pause at a clear point, store the work safely, and continue next session, starting with a short reminder of what each team was doing.

Always protect: safety, every participant having a real role, a short reflection, and the closing. Everything else can be shortened.

Friendly competition (optional)

Some activities, such as the catapult target round or the balloon car distance test, can include a friendly challenge. Use clear criteria, the same materials and practice time for every team, and keep everyone taking part. No one is eliminated. Recognise improvement, careful testing, and teamwork as well as results. Never score faith, personal sharing, or spiritual growth. The community showcase is never a competition.

The session steps are adapted from the UNICEF Adolescent Kit guide "Eight session steps," which recommends a routine set of steps adapted to each group. UNICEF does not endorse this toolkit.

Starting well

Young people answer honestly only when they feel safe. Build trust before asking personal questions. Start with a game that needs everyone; the Warm-ups page has ideas.

Group agreements

Agree on these in the first session, in the young person's own words if possible. Remind the group each time.

- **You can always pass.** No one has to answer.
- **What others share stays here.** Don't repeat someone's story outside the group.
- **Listen without laughing or fixing.**
- **Speak for yourself.** Share your own story, not someone else's.

Be honest about one limit. Say it at the start: "If someone tells us they are being hurt or are unsafe, we will tell someone who can help." Then no one is surprised later.

Team roles

Give each person a role, and switch roles each session so everyone gets to lead.

Role	What they do
Director	Leads the design and guides builders with words or gestures. A strong role for a young person who can't easily handle materials.
Builder	Handles materials and puts the design together (everyone helps).
Tester	Runs each test fairly and counts or measures the result.
Recorder	Remembers, draws, or writes down predictions and results.
Presenter	Shares the team's design and learning.

Talking about failure

How you respond when a design breaks teaches more than any lesson.

Instead of	Try
"That didn't work."	"What did that test teach you?"
"Here, do it like this."	"Where did it break first? Why there?"

"Good job, you won."	"What change made the biggest difference?"

Leading reflection

Every session ends with the same three questions, in this order.

> **Unlearn**
> What did you believe about yourself while you built? Where did that thought come from?

> **Rediscover**
> What does God say is true about you?

> **Live it out**
> What will you do differently this week? Name one choice, relationship, or habit.

The last answer matters most. "I am wonderfully made" is a good start. "This week I'll share my idea in class instead of staying quiet" is the goal.

Each concept suggests a different way for young people to answer, such as drawing or a pair walk, so reflection stays fresh.

Following up

- **Tell a partner.** Each young person tells a partner their Live it out plan.
- **Check in next time.** If the group meets again, start with: "How did your Live it out go?"
- **Hand it to the church.** After a single session, ask young people if the youth leader can hear their plan. The leader follows up within a week.
- **Grace, not shame.** If someone didn't do it, that's not failure. Ask what got in the way, then try again, the way a team redesigns after a test.

Include everyone in the room

Need	What helps
Limited movement or hand use	A space everyone can reach. Work at a comfortable height. Bigger materials. Offer the Director role.

Need	What helps
Low vision or blind	Let them hold materials and a finished example first. Use tests they can hear or feel. Describe results out loud.
Deaf or hard of hearing	Get their attention, then face them. Don't stand with bright light behind you. Show, then tell. Agree on hand signals. Repeat what others say. Learn a few key signs in your national sign language.
Learning differences	One step at a time. Draw the six steps and point to where you are. Short build rounds. The same routine each time.
Reading difficulties, worry, or shyness	Never make anyone read aloud. Let them draw instead of write. Offer roles that don't need presenting. Tell them before it's their turn.

If a young person tells you about abuse or harm

1. Stay calm. Listen carefully. Don't show shock or doubt.
2. Let them speak at their own pace, in their own words. Don't ask leading questions or investigate.
3. Tell them they were right to tell you, and that it is not their fault.
4. Don't promise to keep it secret. Explain kindly that you need to tell someone who can help keep them safe.
5. Write down what they said, in their words, with the date and time.
6. Tell your church's safeguarding lead the same day, and follow your church's policy. Don't confront the person they named.

Safety basics

- Adults use knives and cut bottles or thick cardboard. Young people share scissors carefully.
- Check the space for hazards before young people arrive.
- Ask young people and families privately about health needs, such as seizures, allergies, or medicine. Keep this private.
- Have clean drinking water and a basic first-aid kit nearby.

Warm-ups

Short games to build trust at the start, wake people up in the middle, or calm the group after a serious talk. Use them whenever the group needs to connect.

Human Knot

10 min, high energy, start of a session

Stand in a circle. Everyone reaches across and takes two different people's hands, then the group untangles itself without letting go.

Include everyone: If anyone can't take part physically, play Group Story instead.

Name and motion

5 min, medium energy, first session

Each person says their name with a motion. The whole group repeats both. Go around the circle.

Include everyone: A motion can be anything: a nod, a blink, a wave.

Stand up if...

5 min, low to medium energy, start of a session

Read statements such as "Stand up if you've ever fixed something that was broken" or "... if you speak more than one language." Young people discover what they share.

Include everyone: Raising a hand works as well as standing.

Human machine

5 min, medium energy, before a build

One person starts a repeating motion and sound. Others join one at a time, each connecting to someone already moving, until the group becomes one machine.

Why it helps: Every part matters to the whole machine.

Count to 20

5 min, low energy, calming

The group counts aloud, one person at a time, in no set order. If two people speak at once, start again from 1.

Include everyone: For deaf young people, play by raising fingers instead of speaking.

Back-to-back drawing

10 min, low energy, middle of a session

Pairs sit back to back. One describes a simple shape without naming it; the other draws it. Compare, then swap.

Why it helps: Clear communication is a skill engineers depend on.

Three-minute tower

5 min, high energy, before a build

Same and different

5 min, low energy, first session

Teams get 10 sheets of paper and no tape. Build the tallest standing tower in three minutes.

Why it helps: A fast first try, and a reminder that first tries are meant to be improved.

Pairs find three things they have in common and one way they're different.

Mirror

5 min, low energy, after a heavy reflection

Pairs face each other. One moves slowly; the other mirrors. Swap leaders when the facilitator says so.

Strength web

10 min, low energy, closing

Stand in a circle. Holding the end of a ball of string, name a strength you saw in someone, then pass the ball to them. Keep going until everyone is part of the web.

Why it helps: Each person is seen and connected.

Group story

5 min, low energy, any time

The group tells one story, each person adding a single sentence. Everyone can take part from where they sit.

Forms and reflection resources

Consent and health forms are required for every young person. Each form has its own Print button.

Reflection resources for your program Optional

Young people don't need a worksheet every session. Choose a rhythm that fits your group; talking or drawing is welcome too.

One-day workshop

- **Closing conversation:** Ask one or two reflection questions aloud; a written sheet is not expected.

Weekend program

- **First session:** Invite participants to notice strengths, challenges, and how they approach learning. Form: Identity Check.
- **Later session:** Choose one small way to put a lesson into practice. Form: Live It Out.
- **Final session:** Look back on learning and growth together. Form: Final Reflection.

Week-long program

- **Beginning:** Use an Identity Check as a starting point; writing is optional. Form: Identity Check.
- **Middle:** Pick a practical Live It Out action and discuss progress later. Form: Live It Out.
- **Final day:** Close with a brief written, drawn, or spoken reflection. Form: Final Reflection.

Longer series (such as six sessions)

- **Early sessions:** Invite an initial Identity Check. Form: Identity Check.
- **Midway:** Revisit learning with a Live It Out action. Form: Live It Out.
- **Last session:** Use Final Reflection to look back and choose a next step. Form: Final Reflection.

These are suggested moments, not assignments or a measure of spiritual growth. Use only the forms that help your participants.

Looking for a starting activity? Explore warm-up ideas. Need the full forms? Browse all forms.

Participation and consent template

Check your requirements

Purpose	Records agreement to take part and photo choices.
Who uses it	Families, or older participants themselves.
When	Before the first session.
Is it needed?	Follow your church's policy and local law. If your church already has a consent form, use it instead.
Who keeps it	The organiser, stored securely.
Printing	Yes, one per participant, unless you use an existing form.

Identity to Impact is a hands-on STEM programme run by _____ (church or organisation). Participants build, test, and improve designs in teams, and reflect on what the Bible says about who they are. At least two trusted adults supervise every session.

Participant's name _____ Age _____

Parent or guardian (if under 18) _____ Phone _____

☐ I agree to take part (or for the participant to take part) in Identity to Impact sessions.

☐ Photos or videos may be taken for programme use.
☐ These photos or videos may be shared publicly (for example, on church social media).
☐ No photos or videos, please.

Signature _____ Date _____

Signed by a parent or guardian for participants under 18 (or under the age your local rules set). Participants aged 18–19 can sign for themselves.

Health and emergency information

Check your requirements

Purpose	Gives adults the health and emergency details they may need.
Who uses it	Families, or older participants themselves.
When	Before the first session.
Is it needed?	Strongly recommended. Use your church's existing record if it has one.
Who keeps it	The lead facilitator, kept private and shared only with adults who need it.
Printing	Yes, unless you use an existing record.

Young person's name _____

Emergency contact _____ Phone _____

Second contact _____ Phone _____

Allergies (including latex or food) _____

Medical conditions (e.g. seizures, asthma) _____

Medication and what to do in an emergency _____

Anything that helps this young person take part fully _____

Parent or guardian signature _____ Date _____

Attendance sheet

Recommended

Purpose Shows who came and who had the chance to take part.
Who uses it The facilitator.
When Every session.
Is it needed? Recommended. Your church may already keep attendance; use that if so.
Who keeps it The organiser.
Printing Optional. A notebook works.

Church or site _____ Facilitator _____

#	Name	Age	Consent	Health form	Date:	Date:	Date:	Date:	Date:

Our group agreements Optional

Purpose	Reminds everyone of the agreements the group made.
Who uses it	The whole group.
When	The first session, then displayed each time.
Is it needed?	Optional.
Who keeps it	The group.
Printing	Optional; it can be written on a board.

1. You can always pass.
2. What others share stays here.
3. Listen without laughing or fixing.
4. Speak for yourself.

If someone tells us they are being hurt or are unsafe, the adults will tell someone who can help.

Session reflection Optional

Purpose	Lets participants say what they did and noticed, without scores.
Who uses it	Participants.
When	At the end of a session, if helpful.
Is it needed?	Optional. Participants can skip any question or the whole sheet.
Who keeps it	Participants keep it, or the facilitator collects it only if participants agree.
Printing	Optional.

No name needed. Skip any question. You can write, draw, or tell a facilitator privately.

Date _____ Activity _____

Today...	Yes	A bit	Not yet	No chance today
I tried an idea and tested it.	☐	☐	☐	☐
I used what happened in a test to change something.	☐	☐	☐	☐
I shared an idea or helped someone in my team.	☐	☐	☐	☐
I felt included in my team.	☐	☐	☐	☐

Asking for help or getting help is a good thing. It does not mean you did less well.

One thing I learned or noticed today (words or a drawing):

_____

_____

Anything you want the facilitator to know (optional):

_____

Identity check Optional

Purpose	Lets participants notice how their own views change across a series.
Who uses it	Participants.
When	Only at the start and end of a series, not every session.
Is it needed?	Optional, and only for a series.
Who keeps it	If collected, the organiser stores it securely. Use a participant code, not a name, and agree who can see it.
Printing	Optional.

There are no right or preferred answers. Your answers show how you see things now. They are not a score of faith and do not prove change.

Participant code (only if your organisation matches start and end answers) _____

☐ Start of series ☐ End of series

Statement	Not true	A little	Mostly	Very true	Not sure
I can name a voice that has shaped how I see myself.	☐	☐	☐	☐	☐
I can say something God says about who I am.	☐	☐	☐	☐	☐
I have done something differently because of what I believe.	☐	☐	☐	☐	☐
I believe my small actions can make a difference.	☐	☐	☐	☐	☐

Live it out follow-up notes Optional

Purpose	Helps you remember what participants chose to share, so you can ask kindly next time.
Who uses it	The facilitator.
When	At the next session.
Is it needed?	Optional.
Who keeps it	The facilitator, kept private.
Printing	Optional; a notebook works.

For the facilitator's memory only. Write an action down only if the participant agrees. Private actions do not go here. Not trying, forgetting, or finding it hard are all fine.

First name or code (with permission)	Action they chose to share	What they shared later (if anything)	Difficulties	Possible next step

Final reflection Optional

Purpose	Collects examples, questions, and feedback about the programme.
Who uses it	Participants.
When	At the end of a series.
Is it needed?	Optional.
Who keeps it	The organiser, if participants hand it in.
Printing	Optional; it can be a group discussion.

No name needed. Answer any questions you like, in writing, by drawing, in pairs, or to a facilitator.

1. Which session or activity was most useful or enjoyable, and why?

2. Was there a time something from a session came up in your life? (optional)

3. What questions do you still have?

4. Did you feel included? What would have helped?

5. What should we keep, and what should we change?

Incident or accident report

Follow your procedures

Purpose	Records an injury, accident, or near miss.
Who uses it	The facilitator.
When	The same day as any incident.
Is it needed?	Use your church's procedure; this template supports it.
Who keeps it	The programme lead or safeguarding lead.
Printing	Yes, if your church has no form of its own.

Date and time _____ Location _____

Person involved _____ Reported by _____

What happened?

_____

_____

Injuries and first aid given

_____

Parent or guardian informed? ☐ Yes ☐ No. By whom and when:

_____

What will we change to prevent this happening again?

_____

Disclosure record

Follow your procedures

Purpose Records exactly what a young person said if they share that they are being harmed.

Who uses it The adult they told.

When As soon as possible after a disclosure.

Is it needed? Always follow your church's safeguarding policy. Use this only if it has no form of its own.

Who keeps it The safeguarding lead only.

Printing Yes, if needed.

Date and time of disclosure _____ Place _____

Young person's name _____ Age _____

Adult who received the disclosure _____
