IDENTITY TO IMPACT · CONCEPT PACK

Stored to be released

What we have can be put to good use in serving others.

2 activities · Works without internet · Print any section with your browser's Print option

Live it out

Usually about 90 minutes. Adjust to your group.

Overview

LEARNING GOALS

Identity goal
Young people can name a gift God gave them, the fear that holds it back, and one way to use it this week.

STEM goal
Young people can explain how stored energy turns into movement, and how changing one thing changes the result.

Big idea (2 minutes)
"How we see ourselves shapes how we build and how we live. Today we'll see what happens to energy that stays stored."

ACTIVITY CHOICES

- **Catapult**: best for target challenges.
- **Balloon car**: best for groups who want a vehicle challenge.

Identity: Scripture and reflection

Bible passage: 2 Timothy 1:6–7

What it means
Paul tells Timothy to fan into flame the gift God gave him. God gives a spirit of power, love, and self-control, not fear. Gifts grow when we use them.

What it doesn't mean
It doesn't say faithful people never feel afraid, or that gifts are for showing off. Gifts are for serving others.

Unlearn
What fear keeps your gifts stored up? Where did that fear come from?

Rediscover
Your gifts come from God, and he gives a spirit of power, love, and self-control, not fear.

Live it out
Name one gift you'll use this week, where, and for whom.

Reflection format idea: Gift circle. Teammates name a gift they saw in each other before anyone answers Live it out.

Facilitator note

Some young people believe they have no gifts. Before Reflect, have teammates name a gift they saw in each other during the build.

Activities

Catapult

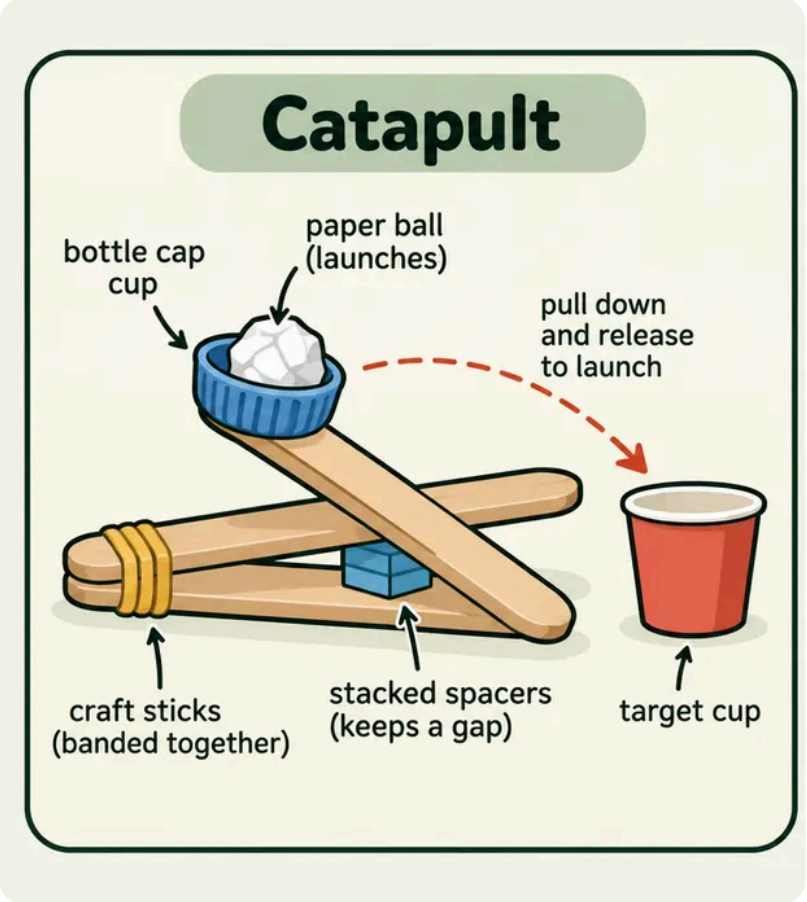

Best for: target challenges.

About 40 min of activity · prep about 5 min · low cost · indoor

No reading needed | Medium energy | Low cost | Indoor

Science | Engineering | Math

Why this activity: When you press the arm down, the stick bends and the rubber bands stretch. That stored energy becomes motion when you let go.

One craft-stick catapult design.

STEM: **Science:** stored energy turning into motion; **Engineering:** adjusting the design to change distance; **Math:** measuring distances and comparing results.

Prep (estimate): About 5 minutes. Count out sticks and rubber bands for each team.

Materials per team

8 popsicle (craft) sticks, 5 rubber bands, a plastic bottle cap, glue or strong tape, soft things to launch such as paper balls, and a target cup 2 m away.

Can't find it? *What matters:* the arm must bend and spring back, and the bands must grip tightly. Hair ties can replace rubber bands. A plastic spoon or the bottom of a paper cup can hold the paper ball instead of a bottle cap. These swaps are our suggestions and haven't been tested.

Steps

1. Pull a rubber band back and hold it: "What is this storing? What happens if I never let go?"
2. Stack 6 sticks neatly. Wrap one rubber band tightly around each end of the stack. This is the stack.
3. Lay a seventh stick across the middle of the stack, at a right angle, to make a cross. Hold it in place with one or two rubber bands crossed in an X. This is the launching arm.
4. Lay the eighth stick under the stack, lined up with the launching arm. This is the base.
5. Wrap a rubber band around one end of the base and the same end of the arm. Now the base and arm form a V lying on its side, with the stack between them.
6. Glue or tape the bottle cap, open side up, onto the raised end of the arm. If you use glue, let it dry.
7. To launch: hold the base flat on the table with one hand. Put a paper ball in the cap. Press the cap down with your other hand, then let go. Point it away from people.
8. Retrieval: launch only when the area is clear. Everyone collects paper balls only when the facilitator says all launching has stopped.
9. Predict what will change the result most, such as the position of the stack or how far you press the arm.
10. Test: launch three times at the same setting. Measure the distance from the front of the base to where each ball first lands, or count hits on the target. Then change one thing only, and launch three times again. Compare averages or hit counts.

> **If it doesn't work:** If the arm doesn't spring back, check that the bands are tight and the stack hasn't slipped. If balls fall out of the cap, press the arm more slowly before letting go. Try moving the stack along the arm and compare results.

Ask while they work: What are we keeping the same? Did three launches give the same result? What one change will you test next?

Safety: Never aim at people. Launch soft objects only. Collect objects only when everyone has stopped.

Science, inclusion, and extensions

> **Bridge to reflection:** The arm held energy the whole time you pressed it, but nothing moved until you let go.

The science: Pressing the arm bends the wooden stick and stretches the rubber bands. Both store elastic energy. When you let go, that energy becomes motion in the arm and the ball. The stack is the pivot (the point the arm turns around). Moving it changes the angle and how the arm bends.

Make it harder (optional): Choose one setting and launch 10 times. Record where each ball lands, make a simple chart, and describe how consistent your catapult is. Then decide one change that should improve accuracy, predict its effect, and test it the same way.

Include everyone: Pre-bundle sticks for young people with limited hand use; they can aim and launch. A tin can as the target lets blind young people hear a hit.

Source: adapted from Science Buddies, "Build a Popsicle Stick Catapult." Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven't been tested yet.

Balloon car

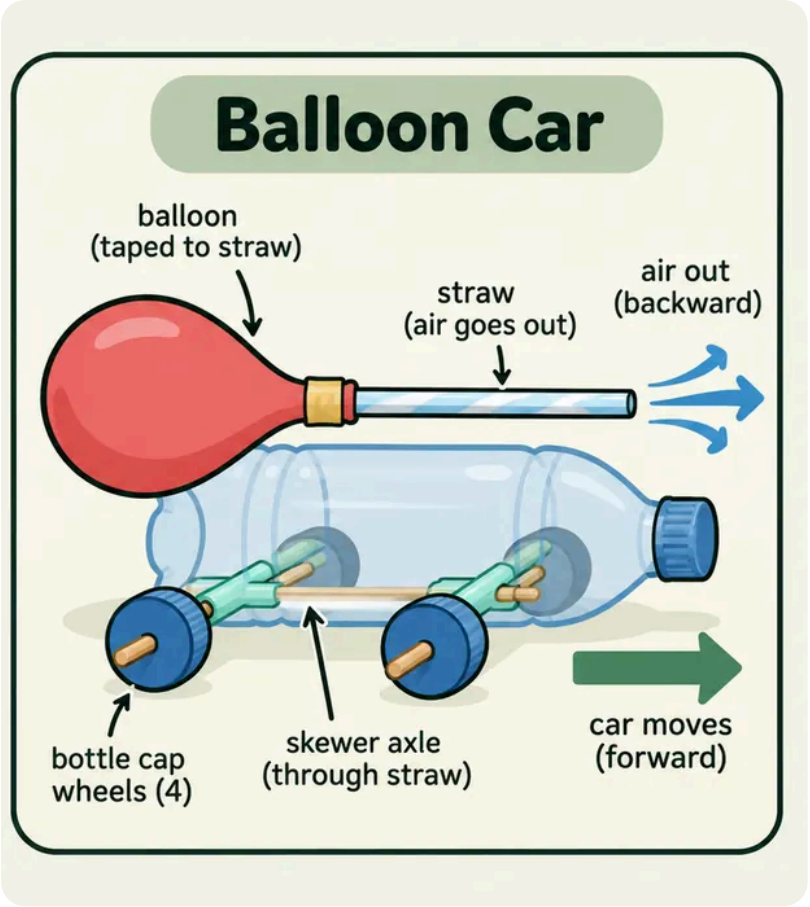

Best for: groups who want a vehicle challenge.

About 45 min of activity · prep about 15 min · low cost · indoor

No reading needed | High energy | Low cost | Indoor

Science | **Engineering** | **Math**

Why this activity: Air stored in a balloon only moves the car once it's released.

One possible car design.

STEM: Science: air pushing one way moves the car the other way; **Engineering:** wheels, axles, and less friction; **Math:** measuring distance and time.

Prep (estimate): About 15 minutes. An adult pokes holes for the axles and checks the wheels turn.

Materials per team

One balloon, 3 drinking straws, a plastic bottle for the body, 4 bottle caps for wheels, 2 wooden skewers for axles, and tape (or a rubber band to seal the balloon).

Can't find it? *What matters:* the axles must turn freely, the wheels must be round with centred holes, and the balloon seal must be airtight. Cardboard circles can replace bottle caps if they are cut carefully round. Straight sticks or pens can replace skewers if they turn freely in the straws. These swaps are our suggestions and haven't been tested, so try one car first.

Steps

1. Adult preparation: make a small hole in the exact centre of each bottle cap, just big enough for a skewer. Push a nail through the cap on a scrap of wood or thick card, pointing away from your hand.
2. Cut two straws to the width of the bottle. These are the axle holders.
3. Tape the two axle holders across the underside of the bottle, one near each end. Keep them parallel to each other and at right angles to the bottle.
4. Push a skewer through one axle holder. This is an axle. Press a bottle cap onto each end of the skewer, open side facing out, to make wheels. Leave a small gap between each wheel and the bottle so the wheels don't rub.
5. Spin the axle with your fingers. It should turn freely inside the straw. Repeat for the second axle.
6. Push the end of the third straw about 2 cm into the neck of the balloon. Wrap tape or a rubber band tightly around the neck to make an airtight seal.
7. Blow through the straw. Check that no air escapes at the seal.
8. Tape the balloon straw along the top of the bottle so the balloon sits on top and the straw's open end points straight backward, just past the end of the bottle.
9. Blow up the balloon through the straw. Cover the end of the straw with a finger to hold the air. Put the car on a smooth floor, facing forward. Take your finger away.
10. Predict how far it will go, then measure. Test: blow the balloon up to about the same size each time, use the same floor, and run three times. Then change one thing only, such as wheel spacing or straw angle, and run three more times.

> **If it doesn't work:** Stuck wheels: check that wheels aren't rubbing the bottle and the axles turn freely. Air leaks: re-tape the balloon seal more tightly. Car turns: straighten the axle holders so they are parallel and point the straw straight back. Car doesn't move: make the car lighter or check the wheels again.

Ask while they work: Do the wheels spin freely? Why does the car move forward when air goes backward? What will you change first?

Safety: Ask about latex allergies before using balloons. Each young person inflates their own balloon.

Science, inclusion, and extensions

Bridge to reflection: A full balloon is just stored air until it's released. Then the car moves.

The science: Air rushing backward pushes the car forward. Friction in the wheels works against it.

Make it harder (optional): Make the car carry a load, such as a bottle cap filled with coins, as far as possible. Then try heavier loads and explain why weight changes how far the car goes.

Include everyone: Young people who can't inflate balloons can design, measure, and race.

Source: adapted from Science Buddies, "Build a Balloon Car." Our change: the balloon straw is taped along the top of the bottle instead of passing through the bottle. Prep times, swaps, calculator amounts, and any changes to the steps are our own and haven't been tested yet.

Have a phone? Try this: Time each run with the stopwatch and work out speed: distance ÷ time.

Session plan

A worked plan for about 90 minutes, using **Catapult**. Times are estimates. Adapt them to your group.

Purpose

- **STEM learning:** stored elastic energy, and fair testing.
- **Identity focus:** using the gifts God has given, instead of holding them back.

Scripture: 2 Timothy 1:6–7

Paul writes to Timothy, a young leader who seems to be holding back. He reminds him of the gift God gave him and that God gives a spirit of power, love, and self-control, not fear.

Before the session

- Count sticks, bands, and caps for each team. Glue caps beforehand if using glue.
- Set up a clear launch area and a target 2 m away.
- Build one catapult and practise the launch.

Time: preparation about 10 minutes (before participants arrive); session about 90 minutes.

The session

1 **Connect** about 10 min

You: Welcome and play "Strength web."

Participants: Take part.

Move on with: "Everyone has something stored up. Let's look at energy."

---

2 **Introduce** about 10 min

You: Pull back a rubber band: "What is this storing? What if I never let go?" Show the build and the launch-and-retrieve routine.

Participants: Predict what will change the result most.

Move on with: "Build your catapult, then wait for the signal to launch."

---

3 **Explore** about 35 min

You: Ask: "What are you keeping the same? Did three launches agree?"

Participants: Build and launch three times at one setting.

Move on with: "Change one thing only."

---

4 Improve and share

about 15 min

You: Run an optional friendly target round with the same rules for all.

Participants: Share results and their best change.

Move on with: "Nothing moved until you let go."

5 Reflect

about 15 min

You: Read 2 Timothy 1:6–7. Use the questions below.

Participants: Talk in pairs, then share.

6 Live it out and close

about 5–10 min

You: Invite one action. Ask for feedback. Collect paper balls and bands.

Participants: Name one action.

Reflect: questions from the experience

- What did the arm need before it could launch?
- Unlearn: what fear keeps one of your gifts stored up?
- Rediscover: what kind of spirit does Paul say God gives?

Live it out (optional action)

This week, use one gift for someone else, even in a small way.

Close, feedback, and cleanup

Recognise good testing and teamwork as well as hits. Collect every band and stick.

Using the other activities in this theme

- **Balloon car:** About 45 minutes. Needs a smooth floor and an adult to make cap holes beforehand. Reflection: the stored air did nothing until it was released.

Running the session

Before each session

- Try the activity yourself. Cut or prepare anything that slows building.
- Put materials into one set per team.
- Read the Bible passage and notes, and answer the three questions yourself first.
- Check who your safeguarding lead is.
- Make sure consent and health forms are in for every young person.

The session flow

Every session follows the same six steps. The times are estimates for a 90-minute session. Your group sets the pace, so adjust as you go.

1 **Connect** — about 10 min

Welcome everyone. Play a warm-up game. In the first session, agree group agreements. In later sessions, ask how last week's Live it out step went.

2 **Introduce** — about 10 min

Share a real-world problem and the big idea. Show the key steps and the safety rules. Teams predict what will happen.

3 **Explore** — 25–45 min, depending on the activity

Teams build or investigate. Walk around and ask questions while they work.

4 **Improve and share** — 10–20 min

Teams change one thing, test again, and tell the group what they found.

5 **Reflect** — about 15 min (at least 10)

Use the Bible passage and the three reflection questions. Talk in pairs first, then as a group. Connect reflection to what actually happened.

6 **Live it out and close** — 5–10 min

Each person names one small action for the week. Ask for quick feedback. Clean up together and close.

How the flow supports the learning journey

I2I's learning journey is **Unlearn** → **Rediscover** → **Live it out** → **Impact**. The session flow is how you walk that journey in one meeting. Connect and Introduce raise the questions. Explore and Improve give a shared experience to think about. Reflect moves through Unlearn and Rediscover. Live it out and close turns reflection into one action, and repeated actions lead to Impact over time.

When things don't go to plan

- **People arrive late:** start Connect with whoever is there. Give late arrivals a role in an existing team rather than repeating instructions for everyone.
- **Instructions aren't clear:** stop the group, demonstrate the step again with real materials, and ask one participant to explain it back.
- **Materials are limited:** use bigger teams, give each person a clear role, or prepare some parts beforehand.
- **A build fails, or results differ from predictions:** treat it as data. Ask, "What happened? Why? What will you change?" Don't fix it for them.
- **A team finishes early:** offer the activity's "Make it harder" idea, or ask them to help test another team's design.
- **Building or discussion takes longer:** shorten Improve and share to one quick change and one retest. Keep at least 10 minutes for Reflect and 5 for closing.
- **A project needs more time:** pause at a clear point, store the work safely, and continue next session, starting with a short reminder of what each team was doing.

Always protect: safety, every participant having a real role, a short reflection, and the closing. Everything else can be shortened.

Friendly competition (optional)

Some activities, such as the catapult target round or the balloon car distance test, can include a friendly challenge. Use clear criteria, the same materials and practice time for every team, and keep everyone taking part. No one is eliminated. Recognise improvement, careful testing, and teamwork as well as results. Never score faith, personal sharing, or spiritual growth. The community showcase is never a competition.

The session steps are adapted from the UNICEF Adolescent Kit guide "Eight session steps," which recommends a routine set of steps adapted to each group. UNICEF does not endorse this toolkit.

Starting well

Young people answer honestly only when they feel safe. Build trust before asking personal questions. Start with a game that needs everyone; the Warm-ups page has ideas.

Group agreements

Agree on these in the first session, in the young person's own words if possible. Remind the group each time.

- **You can always pass.** No one has to answer.
- **What others share stays here.** Don't repeat someone's story outside the group.
- **Listen without laughing or fixing.**
- **Speak for yourself.** Share your own story, not someone else's.

Be honest about one limit. Say it at the start: "If someone tells us they are being hurt or are unsafe, we will tell someone who can help." Then no one is surprised later.

Team roles

Give each person a role, and switch roles each session so everyone gets to lead.

Role	What they do
Director	Leads the design and guides builders with words or gestures. A strong role for a young person who can't easily handle materials.
Builder	Handles materials and puts the design together (everyone helps).
Tester	Runs each test fairly and counts or measures the result.
Recorder	Remembers, draws, or writes down predictions and results.
Presenter	Shares the team's design and learning.

Talking about failure

How you respond when a design breaks teaches more than any lesson.

Instead of	Try
"That didn't work."	"What did that test teach you?"
"Here, do it like this."	"Where did it break first? Why there?"

"Good job, you won."	"What change made the biggest difference?"

Leading reflection

Every session ends with the same three questions, in this order.

> **Unlearn**
> What did you believe about yourself while you built? Where did that thought come from?

> **Rediscover**
> What does God say is true about you?

> **Live it out**
> What will you do differently this week? Name one choice, relationship, or habit.

The last answer matters most. "I am wonderfully made" is a good start. "This week I'll share my idea in class instead of staying quiet" is the goal.

Each concept suggests a different way for young people to answer, such as drawing or a pair walk, so reflection stays fresh.

Following up

- **Tell a partner.** Each young person tells a partner their Live it out plan.
- **Check in next time.** If the group meets again, start with: "How did your Live it out go?"
- **Hand it to the church.** After a single session, ask young people if the youth leader can hear their plan. The leader follows up within a week.
- **Grace, not shame.** If someone didn't do it, that's not failure. Ask what got in the way, then try again, the way a team redesigns after a test.

Include everyone in the room

Need	What helps
Limited movement or hand use	A space everyone can reach. Work at a comfortable height. Bigger materials. Offer the Director role.

Need	What helps
Low vision or blind	Let them hold materials and a finished example first. Use tests they can hear or feel. Describe results out loud.
Deaf or hard of hearing	Get their attention, then face them. Don't stand with bright light behind you. Show, then tell. Agree on hand signals. Repeat what others say. Learn a few key signs in your national sign language.
Learning differences	One step at a time. Draw the six steps and point to where you are. Short build rounds. The same routine each time.
Reading difficulties, worry, or shyness	Never make anyone read aloud. Let them draw instead of write. Offer roles that don't need presenting. Tell them before it's their turn.

If a young person tells you about abuse or harm

1. Stay calm. Listen carefully. Don't show shock or doubt.
2. Let them speak at their own pace, in their own words. Don't ask leading questions or investigate.
3. Tell them they were right to tell you, and that it is not their fault.
4. Don't promise to keep it secret. Explain kindly that you need to tell someone who can help keep them safe.
5. Write down what they said, in their words, with the date and time.
6. Tell your church's safeguarding lead the same day, and follow your church's policy. Don't confront the person they named.

Safety basics

- Adults use knives and cut bottles or thick cardboard. Young people share scissors carefully.
- Check the space for hazards before young people arrive.
- Ask young people and families privately about health needs, such as seizures, allergies, or medicine. Keep this private.
- Have clean drinking water and a basic first-aid kit nearby.

Warm-ups

Short games to build trust at the start, wake people up in the middle, or calm the group after a serious talk. Use them whenever the group needs to connect.

Human Knot

10 min, high energy, start of a session

Stand in a circle. Everyone reaches across and takes two different people's hands, then the group untangles itself without letting go.

Include everyone: If anyone can't take part physically, play Group Story instead.

Name and motion

5 min, medium energy, first session

Each person says their name with a motion. The whole group repeats both. Go around the circle.

Include everyone: A motion can be anything: a nod, a blink, a wave.

Stand up if...

5 min, low to medium energy, start of a session

Read statements such as "Stand up if you've ever fixed something that was broken" or "... if you speak more than one language." Young people discover what they share.

Include everyone: Raising a hand works as well as standing.

Human machine

5 min, medium energy, before a build

One person starts a repeating motion and sound. Others join one at a time, each connecting to someone already moving, until the group becomes one machine.

Why it helps: Every part matters to the whole machine.

Count to 20

5 min, low energy, calming

The group counts aloud, one person at a time, in no set order. If two people speak at once, start again from 1.

Include everyone: For deaf young people, play by raising fingers instead of speaking.

Back-to-back drawing

10 min, low energy, middle of a session

Pairs sit back to back. One describes a simple shape without naming it; the other draws it. Compare, then swap.

Why it helps: Clear communication is a skill engineers depend on.

Three-minute tower

5 min, high energy, before a build

Same and different

5 min, low energy, first session

Teams get 10 sheets of paper and no tape. Build the tallest standing tower in three minutes.

Why it helps: A fast first try, and a reminder that first tries are meant to be improved.

Pairs find three things they have in common and one way they're different.

Mirror

5 min, low energy, after a heavy reflection

Pairs face each other. One moves slowly; the other mirrors. Swap leaders when the facilitator says so.

Strength web

10 min, low energy, closing

Stand in a circle. Holding the end of a ball of string, name a strength you saw in someone, then pass the ball to them. Keep going until everyone is part of the web.

Why it helps: Each person is seen and connected.

Group story

5 min, low energy, any time

The group tells one story, each person adding a single sentence. Everyone can take part from where they sit.

Forms and reflection resources

Consent and health forms are required for every young person. Each form has its own Print button.

Reflection resources for your program Optional

Young people don't need a worksheet every session. Choose a rhythm that fits your group; talking or drawing is welcome too.

One-day workshop

- **Closing conversation:** Ask one or two reflection questions aloud; a written sheet is not expected.

Weekend program

- **First session:** Invite participants to notice strengths, challenges, and how they approach learning. Form: Identity Check.
- **Later session:** Choose one small way to put a lesson into practice. Form: Live It Out.
- **Final session:** Look back on learning and growth together. Form: Final Reflection.

Week-long program

- **Beginning:** Use an Identity Check as a starting point; writing is optional. Form: Identity Check.
- **Middle:** Pick a practical Live It Out action and discuss progress later. Form: Live It Out.
- **Final day:** Close with a brief written, drawn, or spoken reflection. Form: Final Reflection.

Longer series (such as six sessions)

- **Early sessions:** Invite an initial Identity Check. Form: Identity Check.
- **Midway:** Revisit learning with a Live It Out action. Form: Live It Out.
- **Last session:** Use Final Reflection to look back and choose a next step. Form: Final Reflection.

These are suggested moments, not assignments or a measure of spiritual growth. Use only the forms that help your participants.

Looking for a starting activity? Explore warm-up ideas. Need the full forms? Browse all forms.

Participation and consent template

Check your requirements

Purpose	Records agreement to take part and photo choices.
Who uses it	Families, or older participants themselves.
When	Before the first session.
Is it needed?	Follow your church's policy and local law. If your church already has a consent form, use it instead.
Who keeps it	The organiser, stored securely.
Printing	Yes, one per participant, unless you use an existing form.

Identity to Impact is a hands-on STEM programme run by _____ (church or organisation). Participants build, test, and improve designs in teams, and reflect on what the Bible says about who they are. At least two trusted adults supervise every session.

Participant's name _____ Age _____

Parent or guardian (if under 18) _____ Phone _____

☐ I agree to take part (or for the participant to take part) in Identity to Impact sessions.

☐ Photos or videos may be taken for programme use.
☐ These photos or videos may be shared publicly (for example, on church social media).
☐ No photos or videos, please.

Signature _____ Date _____

Signed by a parent or guardian for participants under 18 (or under the age your local rules set). Participants aged 18–19 can sign for themselves.

Health and emergency information

Check your requirements

Purpose	Gives adults the health and emergency details they may need.
Who uses it	Families, or older participants themselves.
When	Before the first session.
Is it needed?	Strongly recommended. Use your church's existing record if it has one.
Who keeps it	The lead facilitator, kept private and shared only with adults who need it.
Printing	Yes, unless you use an existing record.

Young person's name _____

Emergency contact _____ Phone _____

Second contact _____ Phone _____

Allergies (including latex or food) _____

Medical conditions (e.g. seizures, asthma) _____

Medication and what to do in an emergency _____

Anything that helps this young person take part fully _____

Parent or guardian signature _____ Date _____

Attendance sheet

Recommended

Purpose Shows who came and who had the chance to take part.
Who uses it The facilitator.
When Every session.
Is it needed? Recommended. Your church may already keep attendance; use that if so.
Who keeps it The organiser.
Printing Optional. A notebook works.

Church or site _____ Facilitator _____

Our group agreements Optional

Purpose	Reminds everyone of the agreements the group made.
Who uses it	The whole group.
When	The first session, then displayed each time.
Is it needed?	Optional.
Who keeps it	The group.
Printing	Optional; it can be written on a board.

1. You can always pass.
2. What others share stays here.
3. Listen without laughing or fixing.
4. Speak for yourself.

If someone tells us they are being hurt or are unsafe, the adults will tell someone who can help.

Session reflection Optional

Purpose	Lets participants say what they did and noticed, without scores.
Who uses it	Participants.
When	At the end of a session, if helpful.
Is it needed?	Optional. Participants can skip any question or the whole sheet.
Who keeps it	Participants keep it, or the facilitator collects it only if participants agree.
Printing	Optional.

No name needed. Skip any question. You can write, draw, or tell a facilitator privately.

Date _____ Activity _____

Today...	Yes	A bit	Not yet	No chance today
I tried an idea and tested it.	☐	☐	☐	☐
I used what happened in a test to change something.	☐	☐	☐	☐
I shared an idea or helped someone in my team.	☐	☐	☐	☐
I felt included in my team.	☐	☐	☐	☐

Asking for help or getting help is a good thing. It does not mean you did less well.

One thing I learned or noticed today (words or a drawing):

_____

_____

Anything you want the facilitator to know (optional):

_____

Identity check Optional

Purpose	Lets participants notice how their own views change across a series.
Who uses it	Participants.
When	Only at the start and end of a series, not every session.
Is it needed?	Optional, and only for a series.
Who keeps it	If collected, the organiser stores it securely. Use a participant code, not a name, and agree who can see it.
Printing	Optional.

There are no right or preferred answers. Your answers show how you see things now. They are not a score of faith and do not prove change.

Participant code (only if your organisation matches start and end answers) _____

☐ Start of series ☐ End of series

Statement	Not true	A little	Mostly	Very true	Not sure
I can name a voice that has shaped how I see myself.	☐	☐	☐	☐	☐
I can say something God says about who I am.	☐	☐	☐	☐	☐
I have done something differently because of what I believe.	☐	☐	☐	☐	☐
I believe my small actions can make a difference.	☐	☐	☐	☐	☐

Live it out follow-up notes Optional

Purpose	Helps you remember what participants chose to share, so you can ask kindly next time.
Who uses it	The facilitator.
When	At the next session.
Is it needed?	Optional.
Who keeps it	The facilitator, kept private.
Printing	Optional; a notebook works.

For the facilitator's memory only. Write an action down only if the participant agrees. Private actions do not go here. Not trying, forgetting, or finding it hard are all fine.

First name or code (with permission)	Action they chose to share	What they shared later (if anything)	Difficulties	Possible next step

Final reflection Optional

Purpose	Collects examples, questions, and feedback about the programme.
Who uses it	Participants.
When	At the end of a series.
Is it needed?	Optional.
Who keeps it	The organiser, if participants hand it in.
Printing	Optional; it can be a group discussion.

No name needed. Answer any questions you like, in writing, by drawing, in pairs, or to a facilitator.

1. Which session or activity was most useful or enjoyable, and why?

2. Was there a time something from a session came up in your life? (optional)

3. What questions do you still have?

4. Did you feel included? What would have helped?

5. What should we keep, and what should we change?

Incident or accident report

Follow your procedures

Purpose	Records an injury, accident, or near miss.
Who uses it	The facilitator.
When	The same day as any incident.
Is it needed?	Use your church's procedure; this template supports it.
Who keeps it	The programme lead or safeguarding lead.
Printing	Yes, if your church has no form of its own.

Date and time _____ Location _____

Person involved _____ Reported by _____

What happened?

_____

_____

Injuries and first aid given

_____

Parent or guardian informed? ☐ Yes ☐ No. By whom and when:

_____

What will we change to prevent this happening again?

_____

Disclosure record

Follow your procedures

Purpose	Records exactly what a young person said if they share that they are being harmed.
Who uses it	The adult they told.
When	As soon as possible after a disclosure.
Is it needed?	Always follow your church's safeguarding policy. Use this only if it has no form of its own.
Who keeps it	The safeguarding lead only.
Printing	Yes, if needed.

Date and time of disclosure _____ Place _____

Young person's name _____ Age _____

Adult who received the disclosure _____
